

Press Release

Gulf Petrochem India Pvt Ltd

July 06, 2020

Sl. No.	Instrument/Facility	Amount (Rs. Crore)	Ratings	Rating Action
1.	Long Term Bank Facilities- Term Loan	114.00	IVR A-(CE) /Stable (IVR Single A Minus[Credit Enhancement] with Stable Outlook) *	Assigned
		114.00 (Rupees one hundred and fourteen crore)		

**CE rating is backed by corporate guarantee from Gulf Petrochem FZC (GPF)*

Details of Facilities are in Annexure 1

Detailed Rationale

The ratings assigned to the bank facilities of Gulf Petrochem India Private Limited (GPIPL) derives strength from unconditional and irrevocable corporate guarantee extended by Gulf Petrochem FZC (GPF) to the bank facilities of GPIPL. This corporate guarantee results in an enhancement in the ratings of the said instruments to IVR A- (CE)/ Stable/IVR A2+ (CE) (IVR Single A Minus [Credit Enhancement] with Stable Outlook/ IVR A Two Plus [Credit Enhancement]) against the unsupported rating of IVR BB+/Stable (IVR Double B Plus with Stable Outlook).

Further, the ratings derives comfort from the experienced promoters group, diversified revenue stream with geographical diversification of the group, prudent risk management practices, increase in scale up of operations of GPIPL and GP Group in FY19 and FY20, satisfactory capital structure with robust net worth and debt protection metrics of GPF and steady demand prospects of petroleum products. However, the ratings are partially offset by susceptibility to regulatory changes both in India and overseas, low profitability of group, fluctuation in crude price and foreign exchange fluctuation risk.

Key Rating Sensitivities:

Upward Factor:

- Growth in scale of operation with improvement in profit margins leading to improvement in cash accruals and liquidity position on a sustained basis

Press Release

- Improvement in the capital structure and debt protection metrics of the company
- Improvement in working capital cycle of the company
- Improvement in the credit risk profile of the corporate guarantor

Downward factor:

- In case of decline in scale of operation and/or decline in profitability impacting the debt protection metrics on a sustained basis
- In case of deterioration in the capital structure of the company
- In case of elongation in the operating cycle impacting the liquidity or any adverse regulatory changes
- In case of deterioration in the credit profile of the corporate guarantor

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

- **Experienced promoters group**

The group was established under the guidance of Mr. Ashok Goel and Mr. Sudhir Goyal, who has over 30 years of experience in trading operations of petroleum products. The promoters are well assisted by a team of professionals having relevant industry experience in the day-to-day operations. Long-standing presence of the promoters in the industry has helped the group to establish healthy relationship with its customers and suppliers and helped the group to get repetitive orders from its customers. The group is likely to benefit from its promoters extensive experience going forward.

- **Diversified revenue stream with geographical diversification**

The group has diversified product portfolio, which reduces the vulnerability to the demand risks associated with a single product. With presence in multiple segments, including trading, oil storage terminals, bunkering, shipping, and manufacturing of lubricants, grease, and bitumen, the group has healthy geographical diversification with presence in the Middle East, Africa, India, Singapore, and Europe. Established relationships with major suppliers and bulk purchases at group level enhance ability to procure efficiently. Moreover, the group's customers include giant petroleum products trading companies. The group's customer base with its exposure to many industries and companies in different sectors is fairly diversified.

Press Release

- **Corporate guarantee from Gulf Petrochem FZC (rated IVR A- [Is]/ Stable on May 27, 2020)**

An unconditional and irrevocable guarantee and an additional undertaking have been provided by the company's parent, Gulf Petrochem FZC (GPF). The guarantee and the undertaking cover the entire principal and interest payment obligations on the guaranteed bank facilities of GPIPL. The ratings are supported by a payment mechanism to ensure the fulfilment of the debt obligations on the rated instruments.

For arriving at GPF's ratings, INFOMERICS has combined the business and financial risk profiles of GPF and all its subsidiaries. That's because all these companies, collectively referred to as the Gulf Petrochem group, have significant operational linkages in the form of intra-group sales and financial linkages through funding support and corporate guarantees extended to some of its subsidiary companies.

- **Prudent risk management practices**

The group follows a strong risk management policy to mitigate its exposure to volatility in the prices of crude oil and related products. The hedging operations are centralised and managed from the UAE for the entire group.

- **Increase in scale up of operations of GPIPL and GP Group in FY19 and FY20**

The total operating income of GPIPL stood at Rs.9.54crore in FY19 as compared to Rs.8.50crore in FY18. The company reported revenue of Rs.13.32 crore, registering a growth of 39.61% y-o-y as per FY20 provisional numbers. The growth in the revenue was mainly driven by increased storage.

The total operating income of the group has witnessed an increasing trend with a CAGR of ~28.7% during CY16-CY18 and stood at Rs.35571.31 crore in CY18 as compared to Rs.22372.83crore in CY17. The group reported total revenue of Rs.43507.62 crore, registering a growth of 22.31% y-o-y as per CY19 provisional numbers. The growth in the revenue was mainly driven by continued rise in bunkering operations and distillates trading.

- **Satisfactory capital structure with robust net worth and debt protection metrics of group**

The capital structure of the group remained satisfactory over the years marked by its robust net worth base. The net worth stood at ~Rs.5220 crore as on December 31, 2019 (~Rs.4658

Press Release

crore as on December 31, 2018). The overall gearing was moderate at 1.31x as on December 31, 2018 as compared to 1.27x as on December 31, 2017. The marginal moderation in overall gearing was due to higher utilisation of working capital limit as on the account closing date. However, Overall gearing ratio improved to 1.12x as on December 31, 2019 (Prov.) on account of scheduled repayment of term loan, lower utilisation of bank borrowing and accretion of profit to net worth. Total indebtedness of the group as reflected by TOL/TNW also improved from 1.73x as on Dec 31, 2018 to 1.61x as on December 31, 2019 driven by decrease in current liability and steady accretion of profit to net worth. Further, the interest coverage remained strong over the years and stood satisfactory at 2.46x in CY19 (provisional).

- **Steady demand prospects of petroleum products**

India imports a large quantity of crude; and a sharp drop in its prices has benefitted the economy by curbing the current account deficit despite the rise in the quantity of imports. The same provides ample growth opportunities to traders like Gulf Petrochem Group to scale-up the business despite stiff competition that exists.

Key Rating Weaknesses

- **Susceptible to regulatory changes both in India and overseas**

Crude oil is an important commodity traded in the international market, and trading in crude oil is highly influenced by several government policies and regulations, which changes from time to time.

- **Low profitability of group**

The profit margins of the group remained low mainly due to its limited value additive nature of the business. The profitability could be further impacted by the proportion of low-margin products to high-margin products in the complete product portfolio in addition to any incidental expenses that may further reduce the profitability. The EBITDA margin of the company hovered in the range of ~2.2%-3.8% and the PAT margin hovered in the range of ~1.07%-1.62% during CY16-CY19. However, with steady increase in revenue from bunkering and distillates trading in overall revenue mix the operating profit margin witnessed moderation in CY19. Further, increase in interest expenses attributable to increase in cost of fund also resulted in moderation in PAT margin.

Press Release

- **Fluctuations in crude prices**

The profitability is also exposed to the volatility in forex rates due to its high imports. Further, movement in Crude oil prices could lead to inventory losses for the company in a falling oil price scenario. However, the company imports are primarily backed by orders. Nonetheless, the low inventory levels reduce such exposure to some extent. Moreover, the company also has price protection clause to protect itself from crude price fluctuations

- **Foreign exchange risk**

Majority of transactions are in USD or AED. The group is insulated to higher extent as UAE follows the policy of fixed pegging against dollar. As a result the group is insulated against any volatility in dollar rates in case of its global business. Trading and all derivatives contracts are used to hedge physical cargoes with no speculative calls taken on currency movement. The group follows the policy of 100% hedging for products for which paper based trading is available. While forward covers are not available for bitumen, base oil and grease, the remaining products are 100% hedged. However, for these commodities, the price movement is not as volatile as crude. Base oil follows a 2-3 months lag effect in terms of pricing. Overall ~ 100% of the inventories are hedged / back to back contracts.

Analytical Approach:

Credit Enhancement (CE) rating: Assessment of the credit profile of Gulf Petrochem FZC (GPF), provider of unconditional and irrevocable corporate guarantee to the bank facilities of GPIPL.

Unsupported rating: Standalone

Applicable Criteria:

Rating Methodology for Service Companies

Financial Ratios & Interpretation (Non-financial Sector)

Liquidity: Strong

Gulf Petrochem Group has earned a GCA of Rs.585.39 crore compared to its debt obligation of Rs.229.08 crore in CY19. The liquidity profile is supported by sizeable free cash balances along with unutilised working capital borrowing limits. The group has strong healthy liquidity marked by its strong accruals against its repayment obligations. Further, the average utilisation of its working capital limit also remained comfortable at ~47% in the last 4 quarters

Press Release

ended December 2020 indicating an adequate liquidity buffer. Moreover, the group is expected to generate cash accruals to the tune of Rs.750-835 crore as against its debt servicing obligation of ~Rs.156-175 crore during CY21-22.

About Gulf Petrochem India Pvt Ltd

Gulf Petrochem India Pvt Ltd was incorporated by GPF as its wholly-owned subsidiary in 2011. The company commenced commercial operation at Pipavav port, Gujarat, in October 2015; this is used for storage and distribution of bulk petroleum, oil, and lube liquids. The primary business is leasing of storage tanks on rent to third parties..
