#### Details of Facilities are in Annexure I

#### **Detailed Rationale**

The aforesaid rating derives comfort from experienced management, improving scale of operations, diversified product portfolio with geographical presence and comfortable debt protection metrics. However, the strengths are partially offset by thin profitability margin, highly competitive and fragmented nature of industry and risk associated with currency fluctuations and regulatory changes.

#### **Key Rating Sensitivities**

Upward Factors

- Improvement in operating income, profitability and net worth.
- Efficient working capital management

#### Downward Factors

- Any decline in revenues and/or profitability.
- Higher debt corresponding to cash accruals

#### **Detailed Description of the Key Rating Drivers**

#### **Key Rating Strengths**

#### **Experienced management**

The management of Kisha Telelinks Pvt Ltd has got over two decades of experience in the consumer electronics industry where they have been dealing with export of mobile handsets and accessories. Through this management has been able to forge healthy relationship with suppliers and get repetitive orders from customers.

#### Improving scale of operations and operating margins

Kisha Telelinks Pvt Ltd has recorded an operating income of Rs. 180.84 Crs as on 31 March 2019 and revenues has been growing at a CAGR of ~20 per cent over past three fiscals. On y-o-y there has been an increase of 7.42% from FY 18 to FY 19 indicating buoyant sales from the trading activities. It was able to record a progress in EBITDA margin from 1.45% in FY 18 to 1.58% in FY 19 due to rise in revenues.

#### Diversified product/brand profile with geographical presence

KTPL is engaged in trading of various products such as mobile phones of branded companies: Apple, Samsung, Reliance Jio and Huawei – Honor, Mac books of Apple, Smart watches of Apple, mobile accessories of Apple and music player of Saregama Carvaan. Moreover the company has got its presence in domestic as well as export market.

#### **Comfortable debt protection metrics**

The company has been reporting comfortable debt coverage indicators over the years. During FY 19, overall gearing ratio stood at 0.96 despite slight deterioration from the previous fiscal. Due to comfortable adjusted net worth it is having a better Total Outside Liabilities to Adjusted Net Worth (TOL/ANW) of 1.29 and it has improved from previous year's ratio of 1.93. The current ratio also improved in FY 19 from FY 18 where it stood at 1.66 times against 1.50 times. The company has no major fixed repayment obligation as on 31 Mar 2019.

Infomerics Ratings

**Key Rating Weaknesses** 

Thin Profitability margin

The company reported a PAT of Rs. 0.89 Crs in FY19 which is marginally lower than the

previous years' of Rs.0.92 Crs. The PAT for FY-19 did not show much progress on account of

interest payments for its debt obligations and adjustments for depreciation. The working capital

borrowings has increased in FY-19 causing interest burden for the company. The total debt to

GCA stood at 13.33 times in FY-19 against 6.48 times in previous fiscal.

Highly competitive and fragmented industry

KTPL operates in an industry which is characterized by intense competition from domestic and

foreign players. The entry barriers are low which results in thin margins. The industry is also

prone to technology changes and customer preferences.

Exposure of export sales to currency fluctuations and regulatory changes

Around 42 per cent of company's revenue is derived from exports and hence its profitability

remains susceptible to currency fluctuations. The company mainly exports to UAE and Hong

Kong and currently there are no import duty restrictions on these products. Any adverse

regulatory changes in these economies would have an adverse impact on the revenues of

KTPL.

Analytical Approach & Applicable Criteria

Standalone

Rating Methodology for Trading Companies

Financial Ratios & Interpretation (Non-Financial Sector)

**Liquidity: Stretched** 

The company's liquidity in terms of current ratio is adequate as the current ratio stands

at 1.66 times. However, total debt to cash accruals is high and stands at 13.33 times due

to bank borrowings. With average utilization of its working capital limits at 96 per cent,

the liquidity is stretched.
