

## Press Release

### St. Mary's Rubbers Pvt Ltd

April 15, 2020

#### Ratings

Sl. No.	Instrument/Facility	Amount (Rs. Crores)	Rating Assigned
1.	Long Term Facility – Fund Based – Cash Credit	21.00	IVR BBB- / Positive Outlook (IVR Triple B Minus with Positive Outlook)
2.	Long Term Facility – Fund Based – Term Loan	15.86	IVR BBB- / Positive Outlook (IVR Triple B Minus with Positive Outlook)
3.	Short Term Facility – Fund Based – FBP backed by LC	6.00	IVR A3 (IVR A Three)
4.	Short Term Facility – Non Fund Based – Letter of Credit	5.00	IVR A3 (IVR A Three)
	<b>Total</b>	<b>47.86</b>	

#### ***Details of Facilities are in Annexure 1***

#### ***Detailed Rationale***

The aforesaid rating assigned to the bank facilities of the entity derives comfort from its established position in manufacturing and sale of surgical gloves and natural rubber, extensive experience of promoters, operational linkages among group companies along with a closely connected logistics network, average financial risk profile, healthy growth prospects due to increased demand for surgical and related equipment caused by the advent of Covid-19. However, the rating strengths are partially offset by moderate scale of operations & working capital intensive nature of operations, susceptibility to volatile rubber prices and intense competition.

The Outlook is Positive on account of industry tailwinds for surgical gloves arising from the COVID-19 crisis.

## Press Release

### **Key Rating Sensitivities**

#### **Upward factors:**

- Ability to generate and sustain adequate cash flows in relation to its debt servicing obligations
- Sustained improvement in scale of operations
- Significant improvement in debt protection parameters

#### **Downward factors:**

- Further decline in operating margins
- Decline in debt protection and coverage parameters
- Weakening of liquidity profile along with further elevation of working capital cycle

### **Key Rating Drivers with detailed description**

#### **Key Rating Strengths**

##### **Established position in manufacturing and sale of surgical gloves and natural rubber**

The group is an established player in the manufacture and sale of surgical gloves and natural rubber business with a strong presence through a wide distribution network. The group through its plant in Kanjirapally, Kottayam caters to the entire country and has a strong brand name being trusted brands in the rubber industry. The group's manufacturing capacity has grown significantly over the years through inorganic expansion which has helped strengthen its competitive position, through capacity enhancement along with an in-house facility for quality testing; their products have conformity to the EU and FDA quality standards.

##### **Extensive experience of promoters**

SMR Plantation & SM Rubber are private limited companies incorporated in 2014 & 2002 respectively. The company is promoted by Mr. Sunny Jacob and Mrs. Mini Sunny. They possess a considerable amount of experience in the field of rubber trade and processing. The promoters have been involved in the business for over two decades in the rubber trading and processing business.

## Press Release

### ***Operational linkages among group companies along with a closely connected logistics network***

The group companies source raw materials from each other. The horizontal integration in operations has had a positive impact on the overall cost structure of the company. The company has a good supplier network. Its top ten suppliers constitute around a miniscule portion of its total raw material purchases which indicates a well-diversified supply network. Further, majority of its suppliers are located in its close vicinity within the bounds of the location of the plants; which helps the company to save on logistics and mitigate any supply chain disruptions.

### ***Average financial risk profile***

The gearing of the group stands at 1.93x as on March 31, 2019. The current and quick ratio were 1.23 & 0.52 in FY19, respectively indicating stretched liquidity in the short-run. The total debt of the company stands at Rs. 106.57 crore as on March 31, 2019. The long term borrowings have been on a declining trend whereas they have ramped up their short term borrowings, which have been increasing steadily over the 3-year period.

### ***Healthy growth prospects due to increased demand for surgical and related equipment caused by the advent of COVID-19***

The company has seen its growth prospects grow largely due to the coronavirus outbreak which has led to the shutdown of apparel and related item manufacturers based out of China. The closing down of factories in the Mandarin coast has opened up growth prospects to India and Bangladesh as big-name manufacturers from US and Europe are forced to look at alternative sources for their production requirements. Further, exchange rate depreciation is beneficial for the company in the short term, this would also allow them to build new relationships with international clients thereby extending their base of customers.

### ***Key Rating Weaknesses***

#### ***Moderate Scale of Operations & working capital intensive nature of operations***

The operating income of the group as at Rs. 226 crores in FY19. The average collection period was favourable at approximately 38 days, but the average inventory days stand at 114 days

## Press Release

in FY19. This implies a working capital intensive operations where much of the group cash is locked up in inventory which has consequently stretched the operating cycle to 111 days in FY19 from 87 days in FY18, the gross operating cycle has also been on an increasing trend standing at 153 days in FY19. The average utilisation of the working capital limits during the last twelve months ended February 2020 was around 97%.

### ***Susceptibility to volatile rubber prices and intense competition***

Raw material accounts for over 88% of the total production cost. Rubber prices are highly volatile in nature. The group maintains an adequate amount of average inventory (which is ascertained by the orders in hand and by estimating future demand) and procures more rubber between periods of increased demand. Exports have declined significantly in FY2019 due to the constant volatility in international price of latex products and which has led to decline in sales in FY19, as a result of which inventory levels have also increased indicated by the increase in holding period to 114 days in FY19 as compared to 96 days in FY18. The EBITDA margins also remained constrained and range bound (within ~6% - ~8%) effected by the intense competition in the rubber industry. Going forward the company expects the demand to increase substantially given the current scenario and exports to boom as well, leading to greater revenue recognition in the tail-end of the financial year.

### **Analytical Approach: Consolidated**

For arriving at the rating, Infomerics has taken the consolidated view of SMR Plantation Pvt. Ltd. (SMR Plantation) & its 100% subsidiary St. Mary's Rubbers Pvt. Ltd. (SM Rubber) together refer as SMR group for rating purpose. Additionally, SMR Plantation has also given the corporate guarantee to the debt taken by St. Mary's Rubber Pvt Ltd.)

### **Applicable Criteria**

Rating Methodology for Manufacturing Companies  
Financial Ratios & Interpretation (Non-financial Sector)

### **Liquidity - Stretched**

Liquidity is stretched, marked by tightly matched accruals to repayment obligations, highly utilized bank limits and a strained cash balance. Further, the current ratio stands above unity

## Press Release

at 1.23x in FY19. Going forward, the GCA is expected to improve with improved capacity utilization.

### About the Group and Company

St. Mary's Rubbers Pvt Ltd (SMRPL) is a private limited company incorporated on 17th October, 2002. The company has plants located in Koovappally, Kanjirappally and Kottayam in Kerala. The production facility undertakes designing and production of surgical and examination gloves. The major activity that the company undertakes is the procurement of latex in ammoniated form and concentrating it by the centrifuging process into various grades of centrifuged latex (also called "Cenex"). In FY17, SMR Plantation acquired SM Rubber and subsequently the company became a wholly owned subsidiary of SMR Plantation. In 2017, SM Rubber transferred some plants to SMR Plantation, the transfer of assets was recognised in 2018 when all licenses with SM Rubber were transferred in the name of SMR Plantation. Currently, SMR Plantation undertakes the production of Latex and related goods and SM Rubber undertakes the production of surgical gloves, condoms, foams, elastic threads, rubber bands etc. The group is run by Mr. Sunny Jacob and his wife Mrs. Mini Sunny. Mr. Sunny Jacob has over 20 years of experience in the field of rubber trade and processing.
