This is on account of promoters longstanding experience and relationship with customers.

##### **Efficient working capital management**

## Press Release

OSSLAPL manages its working capital efficiently. It allows credit period of around 30-45 days to its customers and maintains inventory of around 7-15 days. The working capital utilisation levels of the company remain moderate as average utilisation levels remained at ~85% during the last nine months ended December 2020.

### **Key Rating Weaknesses**

#### **Customer concentration risk**

OSSLAPL is exposed to customer concentration risk in its revenue profile as it derived ~75 per cent of its revenue from top five customers. Further, top three customers contributed ~70 per cent to its sales in FY2020. The customer concentration is likely to continue in the near to medium term.

#### **Thin profitability margin given trading nature of business**

The profitability margin of the company remains thin due to trading nature of the business where the profit margins are susceptible to raw material prices and highly competitive nature of industry. The EBITDA margin stood low at 0.80% in FY2020 as against 0.54% in FY2019.

#### **Presence in a highly fragmented and competitive agro-commodity trading industry**

The agro-commodity trading business is highly fragmented and characterized by the presence of a large number of organized and unorganized players, which leads to intense competition. The industry also faces constraints with high cost of raw materials, low value addition along with low product differentiation, thus leading to low pricing power.
