NCDs (ISIN: INE696R07026)	75.00	IVR BB-/ RWDI (IVR Double B Minus; Rating Watch with Developing Implications)	IVR BB-/ Stable (IVR Double B Minus with Stable Outlook)	Rating placed on watch with developing implications	Simple
Total	646.00 (Rs. Six Hundred Forty Six crore only)				

Details of Facilities/Instruments are in Annexure 1. Facility wise lender details are at Annexure 2. Detailed explanation of covenants is at Annexure 3.

Detailed Rationale

Infomerics Ratings has placed the ratings assigned to Inbrev Beverages Private Limited (IBPL)'s NCD's under "Ratings watch with developing implications" owing to uncertainty over extension request by IBPL for non-compliance with certain covenants of ISIN INE696R07018, as per declaration by IBPL. Infomerics notes that as per debenture trustee feedback debenture holder have reserve rights to take any action for the said breach which creates uncertainty related to extension.

The ratings continue to reflect improvement in total operating income and operating profitability during FY24, favourable demand outlook for alcohol industry and tangible support from parent company. However, the ratings are partially constrained by leveraged capital structure with lower debt protection metrics, working capital intensive nature of business, significant refinancing risk, intense competition from distributors of other liquor manufacturing principals

Press Release

and highly regulated business with high duties and taxes albeit high entry barriers benefitting the incumbents.

Key Rating Sensitivities:

Upward Factors

- Improvement in profitability metrics thereby leading to overall improvement in cash accruals which is significantly higher than Infomerics expectation could lead to a positive rating action.

Downward Factors

- Dip in operating income and/or profitability impacting the debt coverage indicators or liquidity, subdued industry scenario could lead to a negative rating action.
- Deterioration in capital structure.

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

- **Improvement in total operating income and operating profitability during FY24**
Total operating income has increased by ~80% to Rs.1,614.89 crore in FY24 (refers period from 01st April 2023 to 31st March 2024) (FY23: Rs.899.41 crore), due to increase in spirit sales which was introduced in FY23 which was further scaled up during FY24. EBITDA margin has improved to 10.38% in FY24 (FY23:5.96%) due to higher proportion of high margin spirit sales. IBPL has earned total operating income of Rs.1,1165.78 crore during 9MFY25 which was lower as compared to 9MFY24 due to lower prices with EBITDA margins of 10.02%.
- **Favorable demand outlook for alcohol industry**
India is one of the fastest growing alcohol markets in the world. Rapid increase in urban population, sizable middle-class population with rising spending power, and a sound economy are certain significant reasons behind increase in consumption of alcohol in India.

Press Release

- **Tangible support from parent company**

IBPL has been supported by regular tangible support from its parent company, i.e., Inbrew Beverages Pte Limited, Singapore, in the form of CCD. Since FY23, the parent company has infused Rs.82.73 crore through CCD, and the parent company has committed to support the company as and when it needed.

Key Rating Weaknesses

- **Leveraged capital structure with lower debt protection metrics**

Adjusted tangible net worth (after excluding intangibles) has decreased and stood at Rs.316.32 crore in FY24 (FY23: Rs.356.73 crore), decline is mainly on account of net loss during FY24. Hence, after considering such adjusted TNW, adjusted overall gearing stood high at 2.14x in FY24 against 2.01x in FY23 and TOL/TNW also stood high at 3.94x in FY24 against 3.26x in FY23. The debt protection metrics marked by interest coverage stood low at 1.33x in FY24 against 0.84x in FY23. The Total debt/NCA remained high at 15.62 years in FY24 (FY23:82.781x).

- **Working capital intensive nature of business**

The operations of IBPL remained working capital intensive. IBPL's net operating cycle increased to 114 days in FY24 (FY23: 89 days) due to increase in inventory days which stood at 76 days in FY24 (FY23: 58 days), the inventory days has increased mainly as IBPL had expected more demand for liquor in Q1FY25 and hence, it increased its inventory. The collection days has remained at similar levels and stood at 67 days in FY24 (FY23: 65 days). Creditor days also improved and stood at 29 days in FY24 (FY23: 33 days).

- **Significant refinancing risk**

IBPL exposes to significant refinancing risk due to large repayment of Rs.571.00 crore in FY26 and Rs.75.00 crore in FY27. DSCR is expected to remain below unity during this period due to lower gross cash accruals. As per management, these repayments are expected to refinance through new debt. Ability of the company to refinance these repayments will be key monitorable.

Press Release

- **Intense competition from distributors of other liquor manufacturing principals**

IBPL faces intense competition from distributors of other liquor manufacturing principals. However, IBPL established presence more than four decades gives it some comfort. Further, the discretionary nature of the expenditure also may sometimes limit demand, especially in times of subdued incomes.

- **Highly regulated business with high duties and taxes albeit high entry barriers benefitting the incumbents**

Liquor industry is highly regulated in India with each state controlling the production, sales and duty structure independently including control on pricing. Beside this, there is a ban on all forms of direct and indirect advertising for liquor in the country, leading to market players resorting to surrogate advertising. The complexity of the industry further lies in the different types of distribution models followed in various states like government-controlled agencies, private distribution system and auction. The uncertainty evolving around any regulatory norms make the industry vulnerable and profitability susceptible to any unforeseen changes.

Analytical Approach: Standalone

Applicable Criteria:

[Rating Methodology for Manufacturing Companies.](#)

[Financial Ratios & Interpretation \(Non-Financial Sector\).](#)

[Criteria for assigning Rating outlook.](#)

[Policy on Default Recognition](#)

[Complexity Level of Rated Instruments/Facilities](#)

Liquidity – Stretched

The liquidity of the company remains stretched as the company faces significant refinancing risk during FY26 and FY27 due to lower-than-expected cash accruals against the scheduled

Press Release

repayments. As per management any shortfall will be refinanced through additional debt. Ability of the management to refinance its debt repayments would be key monitorable.

About the Company

IBPL was incorporated in the year 1972. The Company is engaged in the business of manufacture and sale of alcohol beverages including arrangements with various breweries for brewing and sales operations.

Financials (Standalone):
