Mr S.C Sinha is a RC member of IVRPL is on the Board of this entity as a director. He is not involved in the rating process in any manner and the rating note has not been sent to him.

Details of Facilities/Instruments are in Annexure 1. Facility wise lender details are at Annexure 2. Detailed explanation of covenants is at Annexure 3.

#### **Detailed Rationale:**

Infomerics Ratings has reaffirmed the ratings assigned to the bank facilities of PML which continues to derive strength from growth in income levels coupled with improvement in NIM albeit low profitability, adequate capitalisation levels, experienced & professional team and moderation in AUM growth. The ratings are however partially constrained by average asset quality, highly leveraged capital structure and inherent risks associated with MFI industry coupled with intense competition.

Infomerics Ratings expects outlook to remain stable on the expectations of adequate capitalisation levels, sustained growth in income levels coupled with healthy NIM and improvement in asset quality on account of reduction in leveraging of MFI borrowers improving their repayment capability.

### **Press Release**

#### **Key Rating Sensitivities:**

#### **Upward Factors**

 Substantial & sustained improvement in scale of operations along with maintaining and/or improving capitalization levels & asset quality.

#### **Downward Factors**

- Substantial deterioration in the scale of operations.
- Significant deterioration in leverage indicators, asset quality and/or profitability metrics from the current levels.

#### **List of Key Rating Drivers with Detailed Description**

#### **Key Rating Strengths**

- Growth in income levels coupled with improvement in NIM albeit low net profitability: PML's net interest margin improved to 11.62% in FY24 (refers to period 1st April 2023 to 31st March 2024) (FY23: 11.04%) on back of higher net interest spread. This led to PML's net interest income improving y-o-y by~37% to Rs. 17.40 crore in FY24 (FY23: Rs. 12.66 crore). Additionally, PML's other operating income stood at Rs. 6.94 crore in FY24 (FY23: Rs. 4.63 crore) which primarily includes processing fees and income from business correspondence services whereas its ROTA improved to 0.61% in FY24 (FY23: 0.30%) on back of improvement in profitability. However, despite improvement, PML's profitability continues to remain thin marked by PAT in absolute terms which stood at Rs. 1.06 crore in FY24 (FY23: Rs. 0.40 crore). This is on account of PML's high cost to income ratio which improved marginally but continues to remain high at 84.38% in FY24 (FY23: 88.81%). Infomerics Ratings expects growth in income levels coupled with improvement in NIM & net profitability on back of growth in loan assets, higher income from BC services and higher net interest spread.
- Moderation in AUM growth: PML's own book portfolio grew modestly by ~8% to Rs. 155.30 crore in FY24 (FY23: Rs. 144.12 crore) on back of growth in small business loan. PML's moderation in AUM growth in FY24 is on account of PML adopting conservative approach due to the expectations of higher expected credit loss (ECL) in the MFI segment. Additionally, PML's off book portfolio stood at Rs. 38.83 crore in

## **Press Release**

FY24 (FY23: Rs. 10.57 crore). Going forward, PML's ability to grow its AUM amidst maintaining credit costs will be a key rating monitorable.

- Adequate capitalization levels: PML's capitalization levels are adequate, marked by capital adequacy ratio which stood at 20.14% as on 30<sup>th</sup> September 2024 (FY23: 15.65%, FY24: 18.66%) supported by the equity infusion from the promoters with expected equity infusion of ~Rs. 5.50 crore in FY25. Infomerics Ratings expects capitalization levels to remain adequate in FY25 on back of expected infusion from the promoters.
- Experienced and professional management team: PML is overseen by a board of four directors, led by Mr. P. S. Hooda (Managing Director), who has nearly 40 years of experience in the banking and microfinance sectors. Other directors have a deep understanding of the complexities involved in the operations of microfinance and nonbanking financial companies (NBFCs).

#### **Key Rating Weaknesses**

- Average Asset Quality: PML's asset quality is average marked by GNPA and NNPA which stood at 2.95% & 0.92% respectively as on 30<sup>th</sup> September 2024 (As on 31<sup>st</sup> March 2023: 1.36% & 0.08%; As on 31<sup>st</sup> March 2024: 1.92% & 1.18%). The deterioration in asset quality is due to heatwaves, floods, general elections and lower collection efficiency particularly in states like Uttar Pradesh & Jharkhand due to overleveraging of MFI borrowers impacting their repayment capability. Going forward, PML's ability to maintain healthy asset quality by improving its collection efficiency will remain a key rating monitorable.
- Highly Leveraged Capital Structure: PML's capital structure is highly leveraged marked by overall gearing ratio which marginally improved but continues to remain high and at 6.48x at the end of FY24 (FY23: 7.04x). The high gearing is due to relatively high debt funded growth as compared to equity infusion. Infomerics notes that, PML's ability to improve its capital structure will remain a key rating monitorable.

### **Press Release**

Inherent risks associated with MFI industry coupled with intense competition:
 MFI industry is highly prone to regulatory risks & socio-political risks mainly on account
 of its unique collateral free debt nature. Any external events may negatively impact the
 collection efficiencies of MFI. However, given the market potential due to demand of
 micro loans in rural segments, the sector is likely to maintain its high growth. MIFSL
 also faces intense competition from other larger NBFC-MFIs.

Analytical Approach: Standalone

**Applicable Criteria:**

Financial Ratios and Interpretation (Financial Sector)

Criteria for assigning Rating outlook.

Policy on Default Recognition

Complexity Level of Rated Instruments/Facilities

#### **Liquidity** - Adequate

PML had adequate liquidity in the form of unencumbered cash and liquid balances of Rs. 14.16 crore as on March 31, 2024. As the advances comprise relatively shorter-tenure microfinance loans compared to the tenure of the borrowed funds, the asset liability maturity profile remains adequate. It will be important for PML to maintain its collection efficiency while ensuring the regular flow of funds to meet its internal growth projections.

#### **About the Company**

PML was incorporated in August 2017 by one Ms. Mala Srivastava and Ms Sushmita Srivastava to initiate a Micro Finance activity. However, the company received RBI registration for Micro Finance Activities in May 2018 and commenced business operation since then. Currently, PML is registered as NBFC-MFI and provides microfinance service to women oriented Joint Liability Groups (JLG).
