**Details of Facilities are in Annexure 1**

#### **Detailed Rationale**

The ratings assigned to the bank facilities of A.R Thermosets Pvt. Ltd (ART) take comfort from experience management, moderate profitability margin and diverse customer base. However it is partly offset by its modest and fluctuating scale of operations with moderate working capital requirement as reflected by almost 55% utilization of working capital limits along with regular adhoc limits, elongated operating cycle and it's presence in a highly competitive industry.

#### **Key Rating Sensitivities:**

##### **Upward Factors**

Procurement of new orders providing medium to long term revenue visibility along with a substantial and sustained improvement in the revenue and cash accruals while maintaining the debt protection metrics and improvement in capital structure and liquidity.

##### **Downward Factors**

Further elongation of working capital cycle, any decline in the revenue and/or profitability leading to deterioration in liquidity position and impairment in debt protection metrics.

## Press Release

### List of Key Rating Drivers with Detailed Description

#### Key Rating Strengths

- **Established track record of operations and rich experience of the promoters :**

The company has been into the business of manufacturing of road construction materials viz. bitumen, metal crash barriers and road marking paints for approximately two and a half decades i.e. since 1997 which has helped the company to establish a healthy relationship with government as well as private customers. Further, the promoters of the company, Mr. Manoj Gupta and Mr. Saurabh Gupta carry rich experience of over three and two decades respectively in the line of business through which the company has gained strength to expand its footprint in the road sector.

- **Group Support :**

ART is having strong group support from its group company MKU Ltd which is into the business of manufacturing bullet proof jackets and armour solutions. MKU Ltd's management is the same as ARTPL so the ARTPL gets fund support as well apart from bridging linkages through which ARTPL enhances its customer base.

- **Average Financial Profile :**

The financial profile of the company is average as the tangible net worth has increased y-o-y due to retention of profit. The CPLTD for FY22 is Rs.3.15 crs against Gross cash accruals for FY22 of Rs.14.28 crs. The gearing ratio and TOL/TNW is average at 1.28x & 1.75x in FY21. The satisfactory debt protection metrics as ISCR & DSCR stood at 10.38x & 3.36x in FY21 against 5.30x and 1.74x in FY20. The operating profit margin and net profit margin increased to 8.88% & 3.73%% in FY21 from 8.73% & 2.87% in FY20. The current ratio is average at 1.49x in FY21.

- **Continuous Growth in operation :**

## Press Release

The company has a continuous growth in operations as the revenue is increasing since 2019 as it increased by 20% in FY20, and 31% in FY21 and the company is targeting to achieve a turnover of over RS.200 crs in FY22. In the first Ten Months of current FY22, company has already achieved turnover of Rs.194.98 crs. Considering the work orders and the supplier and customer relations, IVR assumes a continuous increase in the revenue.

### Key Rating Weaknesses

- **Working capital intensive nature of operations :**

The nature of operations of the company are working capital intensive which is evident from the elongated conversion cycle of 115 days in FY 2021 as against 110 days in FY 2020. Since the clientele of the company mostly consists of government there is a delay in releasing the payments resulting an increase in receivable days.

- **Intense competition :**

The company faces stiff competition from numerous regional small scale players. The level of government regulation in the infrastructure sector also affects the business operations of the company

**Analytical Approach:** Standalone

### Applicable Criteria :

[Rating Methodology for Manufacturing entities](#)  
[Financial Ratios & Interpretation Non- Financial Sector](#)

### Liquidity – Adequate

ART has an adequate current ratio of 1.49x as on March 31, 2021 and generated cash accrual of Rs 14.28 – 19.32 from F.Y 22 - 24 crore against the repayment of Rs 3.15 – 2.31 crore from F.Y 22-24. Further the liquidity position of the company remained good mainly due to its improved average collection period from various private parties. Accordingly, its fund-based

## Press Release

working capital limits remained Low utilised at ~54.25% during the past 12 months ended Feb, 2022. Further, the non-fund based limits of the company remained fully utilised.
