Total	130.00 (Rupees One hundred and thirty crore only)			

Details of Facilities are in Annexure 1

Detailed Rationale

The assignment/reaffirmation of rating assigned to the bank facilities of Anadrone Systems Private Limited (ASPL) derive strength from its experienced promoter and qualified management team, reputed clientele coupled with healthy order book position providing short term revenue visibility. Also, the ratings positively note the healthy capital structure and sound debt protection metrics of the company in FY2023. However, these rating strengths remain constrained by moderation in financial performance in FY2023; albeit significant improvement witnessed during 9MFY2024, exposure to customer concentration and the need for constant upgradation of technology, tender driven nature of its business with intense competition and exposure to foreign currency fluctuation risk.

Key Rating Sensitivities:

Press Release

Upward factors

- Significant growth in the scale of business with improvement in profitability metrics thereby leading to improvement in cash accruals and debt protection metrics on a sustained basis
- Sustenance of the capital structure

Downward Factors

- Dip in operating income and/or profitability impacting the debt coverage indicators on a sustained basis.
- Moderation in the capital structure with overall gearing deteriorated over 1x
- Stretch in average receivables leading to weakening of liquidity

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

Experienced and qualified promoters and management team

The founder promoter of the company, Mr. Anant Arun Bhalotia is an MBA by qualification and has an experience of over a decade in the manufacturing of arial target drones for the defence sector. He is also the Managing Director of the company and is actively involved in managing the day-to-day operations of the company along with the support of other Directors – Mrs. Sunita Bhalotia (mother of Ms. Anant Bhalotia) and Mrs. Shriya Bhalotia (wife of Mr. Anant Bhalotia). ASPL's long presence in the defence sector has enabled it to build strong relationships with its customers and suppliers. The directors are supported by a team of experienced and qualified professionals.

Reputed clientele, albeit customer concentration

The Ministry of Defence is ASPL's sole customer. The company bids for defence projects floated by the ministry on a fixed-contract basis. Though the company is exposed to client concentration risk, yet association with government department reduces counter party credit risk and ensures regular inflow of orders. However, any changes in the procurement policy of the defence forces or a significant cutback in defence spending may adversely impact the company's revenue and order book position.

Strong financial risk profile marked by healthy capital structure and sound debt protection metrics

The capital structure of the company remained conservative over the past three fiscals with low reliance on external debts. The overall gearing improved and remained comfortable at

Press Release

0.09x as on March 31, 2023, as against 0.24x as on March 31, 2022. Further with reduction in overall debt levels and consequent reduction in interest cost in FY2023, debt coverage indicators also improved with ICR of 14.81x (6.01x in FY2022) in FY23, total debt to GCA of 0.39x (0.56x in as on March 31, 2022) and total debt to EBITDA of 0.29x (0.39x March 31, 2022) as on March 31, 2023. Total indebtedness of the company as reflected by TOL/TNW stood comfortable at 0.87x as on March 31, 2023 (1.06x as on March 31, 2022).

Healthy order book position providing short term revenue visibility

ASPL's order book position as of December 01, 2023, stood at Rs.392.68 crore which provides revenue visibility of 5.32x of operating revenue of FY2023. The orders are expected to be completed within next 12-24 months. ASPL bagging the orders wherein it is technically qualified shall be a key rating monitorable as it drives the revenue towards projected levels.

Favourable industry outlook

The Indian drone industry has been flying high and is expected to move even further in the coming years. The Indian government has set a target of achieving a \$1 billion drone industry by 2025 and has taken various measures to support the industry. Some of them include creating a drone task force and launching a dedicated portal for drone operations. Drones are being increasingly adopted in sectors such as agriculture, defence, and logistics. The defence and security sectors are significant adopters of drone technology for surveillance, reconnaissance, and target acquisition. Government has allocated Rs.120 crores for a PLI scheme to incentivize drone manufacturing in India. Under the PLI scheme for the drone industry, the government will provide incentives to manufacturers based on a fixed percentage of the value addition they make.

Key Rating Weaknesses:

Moderation in financial performance in FY2023; albeit significant improvement during 9MFY2024

Total operating income (TOI) witnessed a moderation from Rs.209.83 crore in FY2022 to Rs.73.82 crore in FY2023 due to slowdown in demand and lower execution of orders by the company. Despite the decrease in top line, EBITDA margin improved significantly from 12.90% in FY2022 to 22.47% in FY2023 on account of decrease in raw material cost and other operational overheads. Also, the amount of closing inventory increased substantially from Rs.6.72 crore as on March 31, 2022, to Rs.24.92 crore as on March 31, 2023, which added to the increase in operating margin in FY2023. The increase in closing inventory as on March

Press Release

31, 2023, is due to stocking of raw materials by the company in view of crystallisation of its upcoming orders and delays in dispatch of finished goods. Also, the delivery of products by the company depends on the milestone dates set by the Ministry of Defence. Since the milestone dates were not due by March 31, 2023, it resulted in increase in inventory levels as on the account closing date. With increase in operating margin, PAT margin also increased significantly from 8.59% in FY2022 to 13.77% in FY2023. However, due to decrease in absolute profits, GCA moderated from Rs.19.11 crore in FY2022 to Rs.12.49 crore in FY2023. TOI witnessed a significant increase during 9MFY2024 to Rs.201.15 crore as against Rs.31.43 crore during 9MFY2023 driven by higher execution of orders. Consequently, ASPL achieved a PBT of Rs.35.33 crore during 9MFY2024 as against a PBT of Rs.4.61 crore during 9MFY2023. Given the current scale of operations and unexecuted order book of Rs.392.68 crore as on December 01, 2023, the operating income and overall profitability is likely to improve going forward. However, the achievability of the same remains critical from rating perspective.

Need for constant upgradation of technology

ASPL need to upgrade/modify its products continuously as per changing customer needs which requires continuous spending on research and development.

Tender driven nature of business coupled with intense competition

ASPL operates in a highly regulated industry with MOD being its only client. Furthermore, the orders are tender-based, and the revenue of the company is dependent on its ability to bid successfully for these tenders. Thus, there is tendency of revenue profile to remain fluctuating depending upon the orders bagged. Nevertheless, with promoters' long standing experience and moderate orderbook in hand the company's financial profile in near to medium term is likely to remain buoyant. However, the defence sector is intensely competitive, characterised by the presence of large players. Besides, a tender-based contract awarding system tends to keep the operating margins under check.

Exposure to foreign exchange fluctuation risk

ASPL is heavily dependent on imports for a major portion of its raw material requirements. Further, the company also imports various services to meet the specific requirements of its customer. Hence, the profitability of the company remains exposed to risk arising out of movements in foreign currencies. Nevertheless, ASPL has earned a forex gain of Rs.2.68 crore in FY23 (Rs.1.29 crore in FY2022). ASPL does not implement any prudent hedging

Press Release

policy. The unhedged foreign currency exposure stood at Rs.52.34 crore as on December 31, 2023.

Liquidity: Strong

The liquidity profile of the company is expected to remain strong in the near to medium term on the back of its expected sufficient cash accruals vis-à-vis its nil long-term debt repayment obligations and healthy gearing headroom underpinned by its comfortable leverage ratios. ASPL earned healthy gross cash accruals of Rs.12.49 crore in FY2023. The overall gearing remained comfortable at 0.09x as on March 31, 2023. The current ratio stood comfortable at 1.32x as on March 31, 2023. Moreover, the average working capital utilisation remained low during the last twelve months ended September 30, 2023, indicating a comfortable liquidity position of the company.

About the Company

Anadrone Systems Private Limited (ASPL) was incorporated in June 2004 as Sure Safety Solutions Pvt. Ltd in Mumbai, Maharashtra. Later rechristened as ASPL during January 2019. The company is engaged in manufacturing and servicing of arial target drones for the defence industry. ASPL has been in technical collaboration with UK based defence specialist QinetiQ Target Systems Ltd from the year 2008 and had become a trusted supplier of modernized, supersonic defence system equipment. ASPL runs its business on an order-based model.
