Press Release

Detailed Rationale

The rating affirmed to the Basel III complaint additional Tier I bonds and Basel III complaint Tier II bonds of Bank of Maharashtra (BoM) derives its strength from factors like sovereign ownership with continued support, adequate capitalisation, healthy resource profile, significant improvement in asset quality over the years. However, the rating is constrained by factors like relatively moderate size and geographically concentrated operations.

Note on Basel-III Compliant Tier-II Instruments

The distinguishing feature of Tier-II capital instruments under Basel III is the existence of the point of non-viability (PONV) trigger, the occurrence of such situation might result in loss of principal to the investors and, henceforth, to default on the instrument by the issuer. According to the Basel III guidelines, the PONV trigger will be determined by the RBI. IVR believes the PONV trigger is a remote possibility in the Indian context, given the robust regulatory and supervisory framework and the systemic importance of the banking sector. The inherent risk associated with the PONV feature is adequately factored into the rating on the instrument.

Note on Basel-III Compliant Additional Tier-I Instruments: The distinguishing features of the Additional Tier I (AT-I) capital instruments (under Basel III) are the discretionary payment of coupons by the Bank and principal write-down upon the breach of a pre-specified trigger. These features increase the risk attributes of AT-I instruments over those of Tier-II instruments under Basel III. To factor in these risks, IVR notches down the rating on these instruments from the Bank's Tier-II bonds. BoM's Common Equity Tier-1 (CET 1) ratio, Tier-I capital adequacy ratio (CAR) and overall CAR stood at 12.28%, 13.72% and 17.61%, respectively, as on September 30, 2023 (12.00%, 12.89% and 16.71%, respectively, as on September 30, 2022) with a substantial cushion above the regulatory requirement. The bank's total reserves were comfortable, at Rs 11,331 Crore as on 30 September 2023, and maintaining adequate eligible reserves for the timely servicing of the coupon payment shall be monitorable. The Bank is yet to raise these bonds. Factors that could trigger a default event for non-equity Tier-I capital instruments (under Basel III) 2 resulting in the non-payment of the coupon are as follows: i) the bank exercising coupon discretion, ii) the inadequacy of eligible reserves to honour the coupon payment if the bank reports losses or low profits, or iii) the bank breaching the minimum regulatory CET-1 ratio. Moreover, given the additional risk attributes, the rating

Press Release

transition for non-equity Tier-I capital instruments (under Basel III) can potentially be higher and faster than that for Tier-II instruments.

Key Rating Sensitivities:

Upward Factors

- Substantial growth in advances and deposits, profitability, and capitalization levels of the bank.
- Substantial improvement in asset quality.

Downward Factors

- Material decline in GoI Shareholding and/or expectation of support from Government of India.
- Any major increase in slippages leading to weakening of asset quality, thereby impacting the earnings profile.
- Any material Decline in overall capital adequacy ratios below the current level.

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

Sovereign ownership with continued support

The Government of India holds 86.46% stake in the bank as of 30 September 2023. The bank is one of the major public sector banks (PSBs) of the country. The bank has received regular capital support from the Government of India. The bank received capital support aggregating to Rs. 8,707 crores over FY18- FY20 (Rs. 3,173 crores in FY18, Rs. 4,703 crores in FY19 and Rs. 831 crores in FY20) from GoI. The GoI is expected to continue to provide significant support to large public sector banks like the Bank of Maharashtra as it plays an important role in penetration of economic and social development.

Press Release

Adequate capitalisation:

Capitalisation of the bank is adequate, with Common Equity Tier-1 (CET 1) ratio, Tier-I capital adequacy ratio (CAR) and overall, CAR at 12.28%, 13.72% and 17.61%, respectively, as on September 30, 2023 (12.00%, 12.89% and 16.71%, respectively, as on September 30, 2022). The bank has flexibility to raise additional equity from the market, with the GoI stake at 86.46% stake in the bank as of 30 September 2023. Bank has raised Rs. 515 crores through Tier-2 bond from institutional investors during September 2023. Bank has also raised Rs. 1000 crores through QIP in June 2023. In addition to this, bank has raised additional capital through Additional Tier -1 bonds of Rs.1590 crores along with tier 2 bond of Rs. 348 crores in FY23. The capital level is also supported by regular infusion from GoI.

Healthy resource profile:

Resource profile of the Bank has continued healthy with the proportion of low-cost CASA deposits at 50.71% as on September 30, 2023 (56.27% as on September 30, 2022). The proportion remains above the industry average, helping the Bank maintain its cost of deposits at a manageable level. The Cost of deposits (quarterly) has remained stable at 4.29% as on September 30, 2023 (3.54% as on September 30, 2022).

Significant Improvement in asset quality over the years:

Asset quality of the Bank, with reported gross NPAs of 2.19% as on September 30, 2023 (3.40% as on September 30, 2022) has shown significant improvement over the years. The Net NPA has improved to 0.23% as on September 30, 2023 (0.68% as on September 30, 2022). As on September 30, 2023, Gross NPAs from the corporate segment stood at 0.32%, followed by MSME (3.20%), agriculture (9.63%) and retail (0.51%). The provision coverage ratio of the bank remained above industry average at 98.40% as on September 30, 2023 (96.06% as on September 30, 2022)

Press Release

Key Rating Weaknesses

Relatively moderate size:

With a total business of about ₹4.22 lakh crore and an asset size of ₹2.7 lakh crore, BoM is one of the smaller PSBs. It is ranked 10th out of the twelve PSBs in terms of asset size and total business. Despite being the PSB with the quickest growth, it will take some time for the bank to reach scale and become competitive with larger PSBs.

Geographically concentrated operations:

BoM's operations are highly concentrated in the state of Maharashtra, which accounts for 51% of the total branches, 75% of the total deposits and 48% of the total advances as on 30 September 2023. While the bank has been opening branches outside the state, concentration risk is likely to reduce over a period of time.

Analytical Approach: Standalone

IVR has considered the standalone approach while assessing the financial and business risk profile of the Bank of Maharashtra. The approach also factors in the support that the bank is expected to receive from the Government of India, both on an ongoing basis and in the event of distress.

Press Release

Liquidity – Strong

The Bank of Maharashtra's liquidity position is supported by the strength of its liabilities franchise and its sovereign ownership. The Bank is having a sizeable retail deposit base that forms a significant part of the total deposits. Its liquidity coverage ratio stood at 143.47% as on September 30, 2023, as against minimum regulatory requirement of 100%. The Bank had cash and cash equivalents amounting to Rs. 14,764 Crores and investments of Rs. 70,179 Crores as on September 30, 2023. Liquidity is further supported by the Bank's access to systemic sources of funds, such as the liquidity adjustment facility from RBI and access to the call money market.

About the Bank

Bank of Maharashtra was registered in 1935 in Pune (Maharashtra) as a public limited company, named The Bank of Maharashtra Ltd., with the objective of assisting small business enterprises, traders and self-employed individuals. Subsequently, with an increasing scale of operations, it became a scheduled bank in 1944 and acquired four small banks (Bank of Konkan Ltd., Bank of Nagpur Ltd., Bharat Industrial Bank Ltd. and Banthia Bank Ltd.) to expand its operations. BoM was nationalised, along with 13 other banks, in July 1969 and has remained a mid-sized public sector bank. As on September 30, 2023, BoM had a wide network of 2,341 branches and 2,391 ATMs, most of which are spread across India with 54% of the total branches in rural and semi-urban areas.

Press Release

Annexure 4: Detailed explanation of covenants of the rated instrument/facilities:

Final Terms of BASEL III Compliant Additional Tier 1 Bonds of Rs 1000.00 Crores

ISIN	INE457A08100 (Rs 290 Crores) and INE457A08118 (Rs 710 Crores)
Issue size	Rs 1000 Crores
Issue date	24-03-2022 for Rs 290 Crores and 08-09-2022 for Rs 710 Crores
Maturity date	Perpetual
Coupon	8.75% for Rs 290 Crores and 8.74% for Rs 710 Crores payable annually
Mode of Issue	Private Placement
Purpose	Augmenting Tier I capital (as the term is defined in the BASEL III guidelines) and over all capital of the issuer for strengthening its capital adequacy and for enhancing its long-term resources.
Key covenants	
Loss absorbency	The Bonds shall be subjected to loss absorbency features applicable for nonequity capital instruments vide RBI Master Circular No. RBI/2015-16/58 DBR.No.BP.BC.1/21.06.201/2015- 16 dated July 01, 2015 on Basel III capital regulations covering terms and conditions for issue of Perpetual Debt Instruments (“PDIs”) for inclusion in Additional Tier 1 Capital and minimum requirements to ensure loss absorbency of additional Tier 1 instruments at pre-specified trigger and of all non-equity regulatory capital instruments at the Point of Non-viability (“PONV”). Accordingly, the Bonds may at the option of the RBI either be permanently written off or temporarily written off on the occurrence of the trigger event called the Point of Non-Viability. PONV trigger.
PONV	The Bonds, at the option of the Reserve Bank of India, can be permanently written off upon occurrence of the trigger event, called the Point of Non-Viability Trigger (“PONV Trigger”)
PONV trigger	PONV Trigger Event, in respect of the Issuer or[its group], means the earlier of: (i) a decision that a conversion or principal write-down, without which the Issuer or its group (as the case may be) would become non-viable, is necessary, as determined

Press Release

	<p>by the RBI; and (ii) the decision to make a public sector injection of capital, or equivalent support, without which the Issuer or its group (as the case may be) would have become non-viable, as determined by the relevant authority; For this purpose, a non-viable bank will be: A bank which, owing to its financial and other difficulties, may no longer remain a going concern on its own in the opinion of the RBI unless appropriate measures are taken to revive its operations and thus, enable it to continue as a going concern. The difficulties faced by a bank should be such that these are likely to result in financial losses and raising the Common Equity Tier 1 Capital of the bank should be considered as the most appropriate way to prevent the bank from turning non-viable. Such measures would include a permanent write-off in combination with or without other measures as considered appropriate by the RBI. A bank facing financial difficulties and approaching a point of non-viability shall be deemed to achieve viability if within a reasonable time in the opinion of the RBI; it will be able to come out of the present difficulties if appropriate measures are taken to revive it. The measures including a permanent write-off or public sector injection of funds are likely to: a. restore confidence of the depositors/ investors; b. improve rating/ creditworthiness of the bank and thereby improving its borrowing capacity and liquidity and reduce cost of funds; and c. augment the resource base to fund balance sheet growth in the case of fresh injection of funds</p>
