*Details of Facilities are in **Annexure 1**

Detailed Rationale

The revision in rating of the bank facilities of Compuage Infocom Limited (CIL) factors decline in scale in FY21 along with elongation in operating cycle.

AFMPL's ratings continue to factor Long operational track record and Experienced management, Strong product mix and association with global brands, Impact of coronavirus and industry prospects and continue to remain constrained by Thin operating margins due to trading nature of business and Highly competitive market conditions, Inherent business risk and Financial leverage and Moderate debt coverage parameters.

Key Rating Sensitivities:

Upward Factors

- Sustained improvement in profitability, scale of operations and decline in leverage.

Downward Factors

Press Release

- Any decline in profitability and/or increase in leverage impacting the cash accruals and debt protection metrics.

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

Long Operational Track Record and Experienced Management

CIL being in business for more than three decades, has established a strong position in the market. It has built a wide distribution network with 46 sales offices, 69 service centres, 25 warehouses and 12000 online & offline channel partners. Mr. Atul Mehta, CEO & Managing Director, have more than 3 decades of experience in the IT distribution industry and is being supported by a team of well qualified and experienced industry professionals.

Strong Product Mix and Association with Global Brands

The company deals in wide range of products belonging to different service verticals like Mobility, IT consumables, Hardware etc. This allows the company to offer wide range of products to its channel partners and project itself as a one stop shop for all its customers and retailers. The company has business relations with 28 global brands, has maintained strong vendor profile with significant vendor additions in the recent past. CIL does not have exclusivity agreements with most of its brands, however, some agreements do exist with specific brands in certain geographies.

Impact of Coronavirus and Industry Prospects

As the COVID-19 pandemic continues to spur remote working, sub segments such as public cloud services will continue to be a growth driver for the company, with cloud computing business contributing 6% of total revenue in FY21 as compared to 2% in FY20. The company has tied up with various vendors for cloud based products and is constantly trying to increase share of total revenue from high margin cloud based products. Further, Work from home has led to a new set of demand for IT products such as laptops, desktops and accessories alongwith increased demand for enterprise, cyber security and cloud softwares which are essential for efficient and safe working environment for the corporates. However, CIL recorded dip in revenue by 11.82% in FY21 at Rs.3729.79 crore as compared to Rs.4232.51 crore in FY20. This was on account of logistics and supply chain management – core functions of IT distribution industry – being severely impacted due to Covid-19 related lockdown restrictions in FY21.

Key Rating Weaknesses

Thin Operating Margins due to Trading Nature of Business and Highly Competitive Market Conditions

Press Release

Low value additive nature of the IT distribution business, coupled with high competition in the industry due to low industry barriers results in the profitability of CIL to continue to remain thin. CIL recorded operating margin of 2.07% during FY21, as compared to 2.09% in FY20.

Inherent Business Risk

Although the company has been able to grow its business with its existing vendors, it is critically dependent on few major relationships that can potentially change in relatively quick time. In FY21, around 65% of CIL's total business came from selling products belonging to its top six vendors of CommScope, Cisco, Microsoft, Asus, HP and Sandisk. With the technology sector as dynamic as ever and newer products and innovations coming up at a fast pace, CIL could do better by diversifying its vendor portfolio.

Financial Leverage and Moderate Debt Coverage Parameters

The capital structure of CIL is moderately leveraged with its overall gearing ratio at 2.73x in FY21 from 2.37x in FY20 and TOL/TNW at 4.09x in FY21 as compared to 4.64x in FY20. Owing to the lower margins and leveraged structure, the company has reported moderate debt coverage parameters albeit, the promoters have managed to infuse fresh funds at regular intervals in the business.

Analytical Approach: Standalone

Applicable Criteria:

[Rating Methodology for Trading Companies](#)

[Financial Ratios & Interpretation \(Non- Financial Sector\)](#)

[Criteria on assigning Rating Outlook](#)

Liquidity: Stretched

The liquidity of the company is adequate with expected gross cash accruals of Rs.32.75 crore, infusion of funds via expected rights issue of Rs.50.00 crore and debt repayment of Rs.32.21 crore due in FY22. The company's working capital limit is highly utilised with average utilisation of 92.81% for the last twelve months ending January 2022.
