Details of Facilities are in Annexure 1

Detailed Rationale

The rating reaffirmation to the NCDs of Hedge Finance Limited (HFL) continues to derive comfort from comfortable capitalisation, improving earnings profile and experienced management. However, the ratings are constrained by weak asset quality, leveraged capital structure and moderate scale of operations given the regional concentration.

Key Rating Sensitivities:

Upward Factors

- Sustained improvement AUM and asset quality while maintaining healthy capitalisation and profitability.

Downward Factors

- Adverse movements in collection efficiency resulting in increased credit costs.
- Substantial deterioration in AUM levels, profitability, capitalisation levels, liquidity and asset quality.

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

Comfortable capitalisation

On the back of consistent capital infusion by promoters coupled with retention of profits, HFL has been able to maintain comfortable capitalisation with total CRAR of 23.40% at the end of March 31 2024, (March 31, 2023: 23.37%) and tangible networth of Rs 45.73 crore for FY24(refers to period April 1st, 2023, to Mar 31, 2024) (FY23: Rs 41.47 crore).

Improving earnings profile

HFL's net interest income and PAT have improved to Rs 19.48 crore and Rs 5.46 crore respectively during FY24 when compared to net interest income of Rs 14.70 crore and PAT of Rs 2.38 crore in FY23 due to growth in AUM and increase in NIM which has improved to 9.15% in FY24 as compared to 8.27% in FY23

Experienced promoters

Hedge Finance Limited is promoted by Mr. Alex K Babu, Founder, Chairman and Managing Director of the company. He has over a decade of rich experience in capital markets & is well supported by an experienced board and management team. The board of the Company was reconstituted in September 2019, by adding experienced bankers with the objective of strengthening the board and to focus on the retail financing space.

Key Rating Weaknesses

Weak asset quality

HFLs portfolio is exposed to high-risk product categories viz., corporate loans and MSME loans, which together contribute to ~50% of total AUM. These sectors were severely impacted by COVID 19 and hence the portfolio was restructured. Also, HFLs loan portfolio has higher percentage of higher ticket sized loans where the risk of delinquencies is higher given slippage from a single account can result in increased NPAs. Asset quality of HFL remains weak with

Press Release

GNPA of 4.44% and NNPA of 2.99% at the end of FY24 (FY23: GNPA:4.67% and NNPA:3.72%). Going forward, ability to improve its asset quality with timely recoveries will be a key monitorable.

Moderate scale of operations given the regional concentration

HFLs total AUM has consistently grown in the last 3 years from Rs 164.50 crore in FY22 to Rs 199.90 crore in FY23 and further to Rs 237.16 crore in FY24 on the back of increased disbursements. Despite consistent growth witnessed in HFLs AUM in the last 3 years, the scale of operations remains moderate given the regional concentration of operations with Kerala contributing to ~99% of total AUM. Going forward, the ability of the company to foray into new states and reduce its geographical concentration will be a key rating monitorable.

Highly leveraged capital structure

HFLs capital structure remains highly leveraged with gearing of 5.07x as on 31 March 2024 (31 March 23:4.65 x) despite regular capital infusion from promoters since most of the growth in AUM is debt funded. However, IVR derives comfort as NCDs, and subordinated debt are subscribed by promoters, friends and relatives and as per management going forward also HFL will raise NCD's and subordinated debt from promoters, friends and relatives. Going forward, the ability of the company to infuse capital and deleverage the capital structure will be a key rating monitorable.
