### Details of Facilities are in Annexure 1

### Detailed Rationale

Earlier Infomerics Valuation and Rating Private Limited (IVR) had moved the ratings assigned to the bank facilities of Kalaignar TV Private Limited (KTVPL) into Issuer Not Cooperating category due to non-submission of information by the company. Now the company has duly submitted all the required information for a detailed review and Infomerics has Upgraded the long-term ratings & removed the long-term ratings from 'ISSUER NOT COOPERATING' category.

The rating upgrade continues to draw comfort from the experienced management and ability of the team to come up with the creative contents. Further, the rating continues to draw comfort from increase in total operating income with moderate debt protection metrics. However, these rating strengths are partially offset by elongated collection period, high level of contingent liabilities and capital-intensive nature of business. The ratings further continue to remain constrained by high competition in the television broadcasting segment along with the rapid advancement in smartphone technology.

The 'Stable' outlook indicates a low likelihood of rating change over the medium term. IVR believes KTVPL's business risk profile will be maintained over the medium term.

## Press Release

IVR has principally relied on the standalone audited financial results of KTVPL upto 31<sup>st</sup> March 2023, and projected financials for FY24, FY25 and FY26, and publicly available information/clarifications provided by the company's management.

### **Capital intensive nature of business**

The segment in which the company operates is highly capital intensive due to the need for procurement of various network rights & licenses along with requirement of infrastructure and equipment. Further, the company also invests significantly in content creation (producing television soaps etc.) in order to attract more viewership. The company has a negative net worth as on March 31, 2023, due to accumulated losses over the last years due to amortization of films rights.

### **High competition in the television broadcasting segment along with the rapid advancement in smartphone technology.**

The media and entertainment industry remains related to the cyclical in advertising spends by corporates. In addition, with increasing competition across genres and the emergence of alternative content delivery platforms such as digital media resulting in fragmentation of viewership, the ability of the company to maintain its leadership position and the resultant share in advertisement revenue will remain crucial.
