

Press Release

Tuaman Engineering Limited

April 03, 2024

Ratings

Facility	Amount (Rs. Crore)	Ratings	Rating Action	Complexity Indicator
Long Term Bank Facilities	66.89	IVR A-; Negative (IVR Single A Minus with Negative Outlook)	Reaffirmed	Simple
Long Term/ Short Term Bank Facilities	518.00 (enhanced from 433.00)	IVR A-; Negative / IVR A2+ (IVR Single A Minus with Negative Outlook/ IVR A Two Plus)	Reaffirmed (assigned for the enhanced portion)	Simple
Total	584.89 (Rupees five hundred eighty four crore and eighty nine lakh only)			

Details of Facilities are in Annexure 1

Detailed Rationale

The reaffirmation of the ratings assigned to the bank facilities of Tuaman Engineering Limited (TEL) continues to derive comfort from its experienced & professional management supported by its qualified managerial & technical team, proven project execution capability and reputed clientele. Further, the ratings also note growth in its scale of operations with improvement in profitability in 9MFY24 along with infusion of fund aggregating to Rs.20 crore in the business by the promoter's. These rating strengths are however offset by its presence in highly fragmented construction sector, susceptibility of its profit to volatility in input prices, moderate capital structure and moderate working capital intensity. The outlook will be revised from negative to stable on receipt of funds into the company as indicated by the promoters within the specified timeline.

Key Rating Sensitivities:

Upward Factors

- Sustained growth in scale of operations with improvement in profitability
- Improvement in the capital structure with improvement in debt protection metrics with increase in interest coverage to over 3x

Press Release

- Effective working capital management leading to reduction in its operating cycle and improvement in liquidity position

Downward Factors

- Dip in operating income and/or moderation in profitability impacting the debt protection metrics.
- Moderation in the capital structure with deterioration in overall gearing to more than 2x and/or moderation in interest coverage ratio to below 2x.
- Moderation in the operating cycle leading to any deterioration in liquidity profile

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

- **Experienced & highly qualified managerial & technical team**

Dr. Pinaki Duttagupta (ED) looks after the overall operations of the company. Dr. Duttagupta, a Mechanical Engineer, has more than two decades of experience in the construction sector. He is well supported by a team of highly qualified & experienced professionals. The company has acquired strong engineering acumen through its successful operations over the years. Moreover, he has an extensive and experienced of designing & drawing department along with many experienced engineers having rich credentials in the infrastructure/construction sector to cater to its regular requirements.

- **Group support**

Initially, TEL was promoted to support Himadri Speciality Chemical Limited (HSCL) in its capacity expansion projects and thereafter, it has been working as an independent company. However, TEL continues enjoys support from the group. The group has established relationship with major steel producers in the country which TEL is leveraging in many matters, including negotiation of rates. Further, the promoters have undertaken to infuse funds to the tune of ~Rs.50 Crore & ~Rs.75 Crore during FY24 & FY25 respectively to support the net worth of TEL. Till March 2024, the promoters have infused fund of ~Rs.20 crore.

- **Proven project execution capability**

Over the years, the company has successfully completed many projects across the country for various medium to large government companies and reputed private companies. In order to manage the projects in a better way and to grow in a balanced way, the company has a policy to take up short to medium term projects (1-2 years) and handle limited number of

Press Release

projects at a time to ensure timely completion. The repeat orders received from its clientele validate its construction capabilities.

- **Reputed clientele**

Major clientele of the company includes central PSUs like GAIL, Bharat Petroleum Corporation Ltd, Indian Oil Corporation Ltd, Rashtriya Ispat Nigam Ltd, Ircon Infrastructure, Burn Standard Co. Ltd., etc. TEL bids for tenders floated by various government entities across the country.

- **Strong order book reflecting satisfactory medium-term revenue visibility**

The company has a strong order book position Rs.1333.71 Crores as on February 28, 2024 which is about 1.97 times of its FY23 construction revenue (i.e. Rs 677.36 crore). The orders are expected to be completed within next one-two years, indicating a satisfactory medium term revenue visibility.

- **Growth in scale of operations with improvement in profitability**

The total operating income increased in FY23 by ~20% to Rs. 677.36 crore as compared to Rs. 574.45 crore in FY22 driven by higher execution of order. With the increase in top line, absolute EBITDA was also improved from Rs.35.57 crore in FY22 to Rs.51.79 crore in FY23. The operating margin improved from 6.19% in FY22 to 7.65% in FY23. The PAT margin also improved from 3.60% in FY22 to 4.35% in FY23. In 9MFY24, TEL achieved revenue of Rs. 650.02 crore EBITDA margin of 6.19% and PAT margin of 3.02%.

Key Rating Weaknesses

- **Susceptibility of profitability to volatile input prices**

Major raw materials used in construction activities are steel and cement which are usually sourced from large players at proximate distances. The input prices are generally volatile and consequently the profitability of the company remains susceptible to fluctuation in input prices. However, presences of escalation clause in most of the contracts provides significant comfort.

- **Moderation in capital structure and debt protection metrics in FY23**

TEL's capital structure, though deteriorated, remains moderate marked by long term debt equity ratio at 0.79x and overall gearing ratio at 1.51x respectively as on March 31, 2023 as against 0.01x and 0.63x respectively as on March 31, 2022. The deterioration in the capital structure is driven by an increase in bank borrowings and term loans taken from NBFC's during the year. Further, total indebtedness of the company as reflected by TOL/TNW moderated to 2.85x as on March 31, 2023 against 1.98x as on March 31, 2022. The interest coverage ratio

Press Release

though continues to remain healthy, moderated from 4.56x in FY22 to 2.35x in FY23 with an increase in finance charges.

- **Highly fragmented & competitive nature of the construction sector with significant price war**

The domestic infrastructure/construction sector is highly fragmented with presence of many players with varied statures & capabilities. A boom in the infrastructure sector, a few years back, resulted in increase in the number of players. While the competition is perceived to be healthy, significant price cut by few players during the bidding process is a matter of serious concern for the users with respect to quality of output.

Analytical Approach: Standalone

Applicable Criteria:

[Criteria on Default Recognition](#)

[Criteria on complexity](#)

Liquidity: Adequate

The liquidity position of the company is expected to remain adequate in the near to medium term driven by expected sufficient cushion in its accruals in the range of ~Rs. 40.91 crore to Rs.63.50 crore as compared to debt repayment obligation in the range of ~Rs. 14.98 crore to Rs.20.80 crore during FY24-FY26. Besides, average fund-based/ non-fund-based utilization for the past 6 months ended February, 2024 is ~86% indicating a moderate liquidity buffer, .
