Press Release

Details of Facilities/Instruments are in Annexure 1. Facility wise lender details are at Annexure 2. Detailed explanation of covenants is at Annexure 3.

Detailed Rationale:

Infomerics Ratings has reaffirmed its ratings assigned to the additional tier I bonds / issuer ratings of UCO Bank (UCO) as it continues to derive strength from sovereign ownership with continued support, robust earnings profile, comfortable capitalization, growth in advances with diversified portfolio and consistent improvement in asset quality over the years. However, the ratings are partially constrained by moderate resource profile and relatively moderate size of operations given the geographical concentration.

The Positive Outlook reflects Infomerics Ratings expectations of continued growth in advances/deposits with geographical expansion in terms of new branches and expectations of maintenance of healthy asset quality and comfortable capitalisation levels.

Note on Basel-III Compliant Additional Tier-I Instruments: The distinguishing features of the Additional Tier I (AT-I) capital instruments (under Basel III) are the discretionary payment of coupons by the bank and principal write-down upon the breach of point of non-viability (PONV). The Bank has a total CRAR of 18.39 % and Tier I ratio / CET-1 ratio of 16.36% / 16.05% as of 30th June 2025, with a substantial cushion above the regulatory requirement. The Bank is having a sizeable retail deposit base that forms a significant part of the total deposits. Its liquidity coverage ratio stood at 122.41% for the quarter ending March 31, 2025, as against minimum regulatory requirement of 100%. The Bank had cash and balances with RBI amounting to Rs. 10,272 crore and net investments of Rs. 94,150 crores as on June 30, 2025 and maintaining adequate eligible reserves for the timely servicing of the coupon payment shall be monitorable. Factors that could trigger a default event for non-equity Tier-I capital instruments (under Basel III) 2 resulting in the non-payment of the coupon are as follows: i) the bank exercising coupon discretion, ii) the inadequacy of eligible reserves to honour the coupon payment if the bank reports losses or low profits, or iii) the bank breaching the minimum regulatory CET-1 ratio. Moreover, given the additional risk attributes, the rating

Press Release

transition for non-equity Tier-I capital instruments (under Basel III) can potentially be higher and faster than that for Tier-II instruments.

Key Rating Sensitivities:

Upward Factors

- Substantial growth in advances and deposits, profitability, and capitalization levels of the bank.
- Substantial improvement in asset quality from the current levels.

Downward Factors

- Any weakening of linkages with Government of India (GoI) thereby impacting the expectations of support from GoI.
- Any major increase in slippages leading to weakening of asset quality, thereby impacting the profitability of the bank.
- Any material decline in overall capital adequacy ratios from the current levels.

List of Key Rating Drivers with Detailed Description

Key Rating Strengths:

Sovereign ownership with continued support: GoI continues to be the majority shareholder holding 90.95% stake in UCO as on June 30, 2025. GoI has consistently provided capital infusions and implemented measures to enhance capitalization, operational efficiency, and asset quality in public sector banks (PSBs). Given the GoI's majority ownership and the significant role of PSBs in the domestic banking system, Infomerics Ratings anticipates that the bank will receive timely and sufficient capital and operational assistance from the GoI as needed, considering it a crucial factor affecting the rating.

Robust earnings profile: UCO's earnings profile is robust marked by global business increasing y-o-y by ~14% to Rs. 5.24 lakh crore (FY25 (refers to period 1st April 2024 to 31st March 2025) : 5.14 lakh crore) on back of growth in domestic business and net interest income (NII) which has grown y-o-y by ~7% to Rs. 2403 crore (FY25: Rs. 9630 crore) on back of

Press Release

growth in advances as on 30th June 2025. Additionally, as on 30th June 2025, UCO's PAT in absolute terms has increased y-o-y by ~10% to Rs. 607 crores (FY25: Rs. 2445 crore) on back of rationalisation in operating and non-interest income has grown y-o-y by ~19% to Rs. 997 crore on back of growth in charges and commission income. UCO's global net interest margin (NIM) has declined to 2.96% for the quarter ending 30th June 2025 (quarter ending 31st March 2025: 2.99%) primarily due to the prompt transmission of policy rate cuts on the lending side, while deposit repricing, being carried out in a phased manner, is yet to be fully aligned. Infomerics Ratings expects UCO Bank's earnings profile to remain robust over the near to medium term, supported by growth in advances driven by further anticipated rate cuts. Additionally, a decline in the cost of funds and credit costs, along with continued rationalisation of operating expenses, is likely to improve the profitability going forward.

Comfortable capitalisation: Capitalisation of the UCO is comfortable, with reported Common Equity Tier-1 (CET 1) ratio, Tier-I capital adequacy ratio (CRAR) and overall, CRAR at 16.05%, 16.36% & 18.39% respectively, as on June 30, 2025 (16.03%, 16.37% & 18.49% respectively, as on March 31, 2025). UCO had raised equity capital worth Rs. 2000 crore through QIP in March 2025 and has also obtained board & shareholder approval for raising equity share capital up to Rs. 2700 crore (face value) in FY26. The capital level is also supported by regular infusion from GoI. Infomerics Ratings expects that the bank will maintain a sufficient buffer above the minimum regulatory capital requirement to meet credit growth supported by the improvement in internal accruals.

Growth in advances with diversified portfolio: UCO's domestic advances has grown y-o-y by ~20% to Rs 1,99,978 crore as on 30th June 2025 (As on 31st March 2025: Rs. 1,95,474 crore) with the Retail, Agriculture and MSME's (RAM) share in the total portfolio continues to be ~63%. Among the RAM segment, retail has grown y-o-y by ~31% driven by growth in the pool and vehicle loan segment followed by MSME which has grown y-o-y by ~20% driven by the growth in disbursements to micro enterprise and agriculture which has grown y-o-y by ~15% driven by growth in Agri infrastructure and ancillary activities segment. Corporate segment has grown y-o-y by ~15% with exposure to sectors like NBFC, infrastructure, metals among others. Infomerics Ratings expects that going forward, RAM will continue to remain the key driver of credit growth for the bank over the medium term.

Press Release

Consistent improvement in asset quality over the years: UCO's asset quality with reported gross NPAs of 2.63% as on June 30, 2025 (FY22: 7.89%, FY23: 4.78%, FY24: 3.46%, FY25: 2.69%) has shown significant improvement over the years. The net NPA has improved to 0.45% as on June 30, 2025, FY22: 2.70%, FY23: 1.29%, FY24: 0.89%, FY25: 0.50%). UCO's restructured standard advances to gross advances stood at 0.70% as on 30th June 2025. Gross NPAs are led by agriculture (10.81%) followed by MSME (5.54%), retail (0.66%) and corporate (0.13%) as on June 30, 2025. UCO's provision coverage ratio (including technical write off) remained above industry average at 96.88% as on June 30, 2025 (96.69% as on March 31, 2025). UCO's slippage ratio (on an annualized basis) stood at 1.18% as on June 30, 2025 (FY25: 1.08%). Infomerics Ratings expects further improvement in asset quality over the medium term on back of lower slippages due to improvement in the credit monitoring policy.

Key Rating Weaknesses:

Moderate resource profile: Resource profile of UCO has remained moderate with the proportion of low-cost CASA domestic deposits declining marginally to 36.91% as on June 30, 2025 (37.91 % as on March 31, 2025). The cost of deposits and cost of funds have largely remained stable at 4.84% & 4.73% respectively as on June 30, 2025 (4.85% and 4.78% respectively for FY25). Infomerics Ratings expects the CASA deposits growth to remain moderate in line with the overall banking industry trend in the medium term.

Relatively moderate size of operations given the geographical concentration: With a total business of about Rs. 5.24 lakh crore and an asset size of Rs. 3.66 lakh crore as on 30th June 2025, UCO is one of the moderately sized PSBs. Infomerics Ratings believes that UCO will take some time to reach scale and become competitive with the larger PSBs. Also, UCO's operations are highly concentrated in the eastern and northern parts of India which accounts for ~56% of the total branches. Moreover, ~61% of the total branches are concentrated in the rural and semi-urban parts of the country. While the UCO has been opening branches outside the regions, concentration risk is likely to reduce only in the long term.

[Issuer Rating – Methodology](#)

Liquidity – Strong

UCO's liquidity position is supported by the strength of its liabilities franchise and its sovereign ownership. UCO is having a sizeable retail deposit base that forms a significant part of the total deposits. Its liquidity coverage ratio stood at 122.41% for the quarter ending March 31, 2025, as against minimum regulatory requirement of 100%. The Bank had cash and balances with RBI amounting to Rs. 10,272 crore and net investments of Rs. 94,150 crore as on June 30, 2025. Liquidity is further supported by the UCO's access to systemic sources of funds, such as the liquidity adjustment facility from RBI and access to the call money market.

About the Company

UCO was founded in 1943 as United Commercial Bank by the industrialist Mr. G. D. Birla. UCO was nationalized in 1969 and renamed as UCO Bank in 1985. UCO is a public sector bank which is engaged in retail banking, corporate/wholesale banking, priority sector banking, treasury operations and other banking services. UCO operates through a network of 3305 branches in India, 2 branches overseas each in Hong Kong and Singapore, 1 representative office in Iran, 2575 ATMs and 10920 BCs as on June 30, 2025.
