<b>Total</b>	<b>164.59</b>	<b>(Rupees One Hundred Sixty-four crores and fifty-nine lakhs only)</b>		

\*Withdrawn as the company has not proceeded with the facility as envisaged

#### Details of Facilities are in Annexure 1

#### Detailed Rationale:

The revision of the ratings assigned to the bank facilities of ASPL reflects overall improvement in financial & operational performance of the company in H1FY23 which is expected to sustain in H2FY23 and beyond. Further, the rating continues to derive strength from its experience of promoters in agri & food processing related business, entry barriers in French fries' segment and established relations with farmers, creation of entire value chain, strategically located plant, reputed clients base, favourable growth prospects for processed food industry and improvement in overall operational & financial profile as expected. However, the rating

## Press Release

strengths are partially offset by raw materials procurement, agro-climatic and other regulatory risk, high working capital intensity and exposure to foreign exchange fluctuations.

### **Key Rating Sensitivities:**

#### **Upward Factors**

On a consolidated basis

- Sustained and significant improvement in the scale of operations while improving profitability & debt protection metrics.
- TOL/ATNW below 1.5x on a sustained basis.

#### **Downward Factors**

- Any decline in scale of operations and/or profitability, leading significant deterioration of debt protection metrics on a consolidated basis.

### **Key Rating Drivers with detailed description**

#### **Key Rating Strengths:**

##### **Experience of promoters in Agri & food processing related business**

The Group leveraged on its promoter family's six decade experience in potato segment to venture into processing of potato-based products, namely Frozen French fries and allied frozen potato snacks, potato flakes, etc. Also, backed by the extensive and significant experience, the promoters have a strong understanding of the local dynamics.

##### **Entry barriers in French fries Industry and established relations with contract farmers**

French fries manufacturing requires a special varieties of potato which are essentially protected varieties and a five year cycle is required to have the seed pipeline of such varieties in place. The high quality seed potato from such controlled pipeline is made available by the company to its contract growers for commercial crop (used for processing) under the contract farming model. There are criticalities involved in terms of organizing the seed pipeline, procurement through contract farming and high capex for the setting up of processing plant and establishing the requisite cold chain. One of the group companies Hyfun Agrilink Private Limited (HAPL) has its own seed multiplication program which starts with sourcing mini-tubers from reputed tissue culture labs. After three consecutive seasons (years) of seed multiplication, the third generation seed potatoes are provided to the farmers in Gujarat under contract farming agreement with the Group at a predetermined price for commercial cultivation of potato as per the Group's processing needs.

## Press Release

### **Catering to entire value chain:**

The Company's unique "Seed to Shelf" business model is fully integrated enabling the entire value chain, wherein they carry out seed multiplication program and thus provide best quality seeds to the farmers. The procurement of raw potatoes for processing is done majorly through contract farming and the quantities are procured during the harvest season itself and the group undertakes storage in advanced high technology cold storages until processed. The potatoes are processed into various frozen snacks like French fries, hashbrowns, Aloo tikki, Burger patties etc., and further supplied through cold chain network to the distributor point/ retailer shelf.

### **Strategically located plant**

The Group manufacturing facilities are based in Mehsana, Gujarat, which is centrally located in the potato growing belt of North Gujarat i.e. area which is conducive for cultivation of processing varieties of potato. This enables group to procure potatoes with desired parameters within short radius of 100-120 km area from its contract farmers. Also, the plant is strategically located in terms of availability of necessary infrastructure and logistics, cold storage facilities, uninterrupted power supply, lower transportation cost (being within the potato growing belt) and proximity to ports for exports.

### **Improvement in overall operational & financial profile**

The Group's consolidated revenues increased to INR 596.58 Crore in FY2022 from INR 488.60 Crore in FY2021. The EBITDA margin deteriorated substantially in FY22 to 11.31% in FY22 from 16.46% in FY21 due to impact of Covid-19 resulting in increase of raw material cost along with other overheads. The capital structure of the group remained stable with overall gearing of 1.52x in FY22 and 1.51x in FY21. The long debt-equity stood at 2.12x in FY22 as against 1.83x in FY21. The financial risk profile of the group is healthy marked by healthy net worth, debt protection metrics and debt coverage indicators. The adjusted net worth stood moderate at INR 201.45 Crore as on 31st March 2022 (31st March 2021: INR 179.24 Crore). Interest coverage ratio stood at 3.37x in FY22 (FY 21: 5.04x). Total debt increased to INR 279.47 Crore in FY22 (INR 240.79 Crore). Total Debt / GCA ratio was at 3.74 times in FY2022. Total debt/GCA, interest coverage & other debt protection metrics are expected to remain moderate moving forward.

## Press Release

During H1FY23, the company has shown a significant increase in top line & EBITDA margin. Revenue improved from INR 206.93 crores in H1FY22 to INR 469.37 crores in H1FY23 and EBITDA margins improved to 18.99% in H1FY23.

The plant is running at full capacity, further any substantial increase in the revenue will need capacity enhancement. The management indicated that the capex plan is under consideration.

### **Reputed customer base**

The group caters to reputed customers which includes global QSR chains such as Burger King, KFC, etc. and also to well known Indian brands like Mother Dairy, ITC, Godrej, Wal-Mart India etc. The Group has a strong 300+ distributor network pan India to cater to HoReCa segment. On the exports front the group have varied marquee customers like Siam Makro, Jagota Brothers, KCG, MyDin, Lotteria, etc. to name a few. Around 70-75% of sales are through exports to countries such as Thailand, Philippines, Dubai, Saudi Arabia, Malaysia, Singapore, Nepal etc. The products are present in these markets with retail stores such as Tesco Thailand, Makro Thailand & Mydin Malaysia. Year-on-year the company has been expanding its footprints to new geographies.

### **Favorable growth prospects for processed food industry**

Increasing working population, burgeoning urban and young population along with changing lifestyles of people and the paucity of time in a fast-paced world are expected to be driving factors for growth of the processed food industry.

### **Key Rating Weaknesses:**

#### **Raw materials procurement, agro-climatic and other regulatory risk:**

The business operations and profitability remain exposed to the adequate availability of quality potato at good prices. The raw materials which consist of around 70% of the total cost are susceptible to fluctuations in production due to vagaries of nature.

#### **High working capital intensity**

The main raw material for manufacturing fries (the end product) is potato. Since potato season generally ends in April, the company is required to start stocking potatoes from February to meet the requirements for the entire year, which leads to high inventory.

## Press Release

Accordingly, the working capital requirements remain high during that particular time period.

### **Exposure to foreign exchange fluctuations:**

Since a bulk of the sales is made to foreign countries, the firm is exposed to unexpected foreign exchange price movements, as the export realizations are generally in US\$ terms. However, the company already has a hedging policy in hand, which it implements on a need basis. At any point of time around 70% of the exposure remains hedged, which mitigates the currency risk to a major extent.

### **Analytical Approach:** Consolidated Approach

Infomerics has consolidated the operational and financial risk profile of Asandas & Sons Private Limited (ASPL) - Parent Company and Hyfun Agrilink Private Limited (HAPL), Hyfun Foods Private Limited (HFPL), Hyfarm Foods Private Limited (HFPL) and Hyfun Food Supply Chain Private Limited (HFSCPL) - 100% Subsidiary Company for arriving at the rating. All the companies are collectively known as Hyfun Foods Group.

### **Applicable Criteria:**

[Criteria of Rating Outlook](#)

[Rating Methodology for Manufacturing Companies](#)

[Financial Ratios & Interpretation \(Non-Financial Sector\)](#)

[Rating criteria for Consolidation of Companies](#)

### **Liquidity – Adequate**

The liquidity of the company remains adequate marked by the comfortable cash accruals as against the long-term debt repayment obligations. However, its average maximum fund-based working capital utilization for the 12 months ended October 2022 stood high at around 95%. Its operating cycle remains elevated at 113 days in FY22 from 96 days in FY21 due to the business model. The Current ratio stands at 1.35x for FY22. The cash and cash equivalents stood at INR 0.68 crores in FY22.

## Press Release

### About the Company:

Incorporated in the year 1962 as a partnership firm, the company changed its constitution recently and now is known as Asandas & Sons Private Limited (ASPL). In 2016, to leverage out their long standing experience in the potato segment and with a vision to diversify and provide value added products, the company ventured into frozen potato French fries and other potato based products by setting up a plant in Mehsana, Gujarat. The Company has an installed of 66,000 MTPA.

The company sells these niche products under the its brand name of 'HyFun'.
