#### **Century Extrusions Limited**

#### March 13, 2023

#### **Ratings**

Natings				
Instrument / Facility	Amount (Rs. crore)	Ratings	Rating Action	Complexity Indicator
Long Term Bank Facilities	60.36	IVR BBB under Rating Watch with Developing Implications (IVR Triple B under rating watch with developing implications)	Reaffirmed and placed under Rating Watch with Developing Implications	Simple
Short Term Bank Facilities	15.50	IVR A3+ under Rating Watch with Developing Implications (IVR A three Plus under rating watch with developing implications)	Reaffirmed and placed under Rating Watch with Developing Implications	Simple
Total	75.86 (INR Seventy- five crore and eighty six lakhs only)	00		

#### **Details of Facilities are in Annexure 1**

#### **Detailed Rationale**

The ratings assigned to the bank facilities of Century Extrusions Limited (CEL) have been placed under rating watch with developing implications since a group company of CEL, Century Aluminum Manufacturing Co Ltd. (CAMCO) has been under stress and classified under NPA due to its liquidity issues. CAMCO has already settled its account with two lenders and is also currently in discussions with the other lenders. However, the timelines for conclusion of the settlement process with all the lenders is yet to be specified. Timely settlement of CAMCO's account with all the lenders would remain a key monitorable and Infomerics will take a view on the ratings once the timeline for completion of settlement is clear.

The rating also considers healthy growth in its scale of operations in FY22 coupled with growth in financial performance of the company in Q3FY23. Further, the ratings continue to derive comfort from the company's long track record of operations and extensive experience of the promoters in the aluminium industry, low customer concentration risk and its satisfactory

### **Press Release**

financial risk profile marked by satisfactory gearing and adequate debt protection metrics. However, these rating strengths continue to remain partially offset by susceptibility of CEL's operating margin to volatility in raw material prices and exposure to cyclicality in the aluminium industry.

#### **Key Rating Sensitivities:**

#### **Upward factors**

- Significant growth in scale of business with improvement in profitability metrics thereby leading to overall improvement in cash accruals and debt protection metrics on a sustained basis
- Sustained improvement in the capital structure and debt protection metrics
- Effective working capital management with improvement in operating cycle and liquidity

#### **Downward factors**

- Dip in operating income and/or profitability impacting the debt coverage indicators
- Deterioration in the capital structure with overall gearing to more than 1.25x and interest coverage to below 2x
- Elongation in the operating cycle impacting the liquidity and higher average utilisation in bank borrowings remained at more than 90% on a sustained basis

#### List of Key Rating Drivers with Detailed Description

#### **Key Rating Strengths**

#### Long track record and extensive experience of the promoters in the aluminium industry

The company has a long track record of nearly three decades in the aluminum industry with manufacturing commencing since 1991. CEL is promoted by one Jhunjhunwala family of Kolkata. Currently the operations are looked after by Mr. Vikram Jhunjhunwala, son of Late Mr. M.P. Jhunjhunwala, who has an experience of about three decades in manufacturing and factory administration for aluminum extruded products. He is well supported by a group of experienced professionals in managing the day-to-day operations of the company. The extensive experience of the promoters and the long track record of nearly three decades in the aluminum industry has helped the company to establish a healthy relationship with customer and suppliers.

# 0

## **Infomerics Ratings**

### Press Release

#### Low customer concentration risk

CEL has around 500 customers pan India with top five customers contributing to ~19% to total sales on an average. Further, CELs products cater to various sectors including industrial, power sector, engineering etc. with no single customer contributing to more than ~ 6% of the total sales indicating a diversified revenue profile.

#### **Growth in financial performance in Q3FY23**

The company has achieved y-o-y growth in its financial performance and during 9MFY23, the has achieved net profit of Rs.5.49 crore on a revenue of ~Rs. 291.84 crore.

#### Satisfactory financial risk profile

The financial risk profile of CEL is marked by its satisfactory net worth, comfortable gearing and moderate debt protection metrics. Infomerics expects that the financial risk profile of the company to remain satisfactory in the near term.

#### **Key Rating Weaknesses**

#### Susceptibility of operating margin to volatility in raw material prices

The aluminium ingots and billets are the key raw material for CEL. CEL procures these materials at the price prevailing on the date of its dispatch. The aluminium industry is cyclical in nature with prices for the commodity driven by changing demand and supply conditions in the market which also has strong linkages to the global market. This results in risk of price fluctuation on the inventory of raw materials as well as finished goods. The overall working capital intensity of CEL's business is driven by its raw material inventory which in turn is governed by its order execution cycle.

#### Exposure to inherent cyclicality of the metal industry

The metal industry is cyclical in nature and the company is also exposed to the same.

Analytical Approach: Standalone

Applicable Criteria:

Rating Methodology for Manufacturing Companies

Financial Ratios & Interpretation (Non-financial Sector)

Criteria of assigning Rating Outlook

Liquidity - Adequate

### **Press Release**

Liquidity position of the company is expected to remain adequate marked by its expected gross cash accruals in the range of Rs.11.00-12.00 crore as compared to debt obligation in the range of Rs. 2.55-4.28 crore during FY25-FY23. The current ratio is also comfortable at 1.62x as on March 31,2022.

#### **About the Company**

Established in 1991, Century Extrusions Limited (CEL) was promoted by Late Mr. M.P. Jhunjhunwala and currently managed by his son Mr. Vikram Jhunjhunwala. The company has an annual installed capacity of 15000 MT. CEL possesses in-house facilities for die manufacturing, melting and casting of billets and an extrusions manufacturing facility with three press lines. The manufacturing facilities of the company is located in Kharagpur, West Bengal. CEL manufactures extrusions for varied applications i.e. architectural, hardware, road transport - vehicles, railways, electrical and electronic applications, engineering applications, automotive sector, consumer durables, defence applications, irrigation etc. The client portfolio of the company comprises over 500 customers pan India.
