### Details of Facilities are in Annexure 1

#### Detailed Rationale

On 29 May 2024, MSFL issued fresh NCD (Zero coupon bond) of Rs 100.00 crore with a maturity of two years three months and has redemption amount of Rs 126.49 crore. Post issuance of fresh NCDs, MSFL has Rs 2.00 crore of proposed NCDs and Rs 498.00 crore of issued NCDs.

The ratings assigned to bank facilities/ debt instruments of MSFL continues to derive comfort from established track record of group and experienced promoters, healthy retail broking business, healthy scale of operations with improved margins and comfortable capitalization. However, these rating strengths remain constrained by susceptibility to uncertainties inherent in the capital market business and Intense competition.

#### Key Rating Sensitivities:

##### Upward Factors

- Sustained improvement in financial performance & profitability margins.

##### Downward Factors

- Substantial decline in trading volumes and profitability.
- Changes in the regulatory environment

#### List of Key Rating Drivers with Detailed Description

##### Key Rating Strengths

##### Healthy scale of operations with improved margins

Total operating income of the company has increased by ~99% to Rs.705.60 crore in FY24 (refers to period April 1st, 2023, to Mar 31, 2024) as against Rs.354.18 crore in FY23 on account of increase in trading volumes in FY24. The company has successfully managed to maintain & improve its profitability margins over the years. EBITDA & PAT margins of the

## Press Release

MFSL has improved to 75.46% & 46.13% respectively in FY24 as against 59.70% & 32.10% respectively in FY23.

### **Comfortable capitalization**

The company's adjusted tangible net worth improved to Rs.915.59 crore as on March 31, 2024, as against Rs.489.73 crore as on March 31, 2023. The gearing stood low at 1.06 times as on March 31, 2024, as against 0.56 times as on March 31, 2023. The company has its major borrowings through overdraft & bank guarantee for meeting the working capital requirement and as a security deposit in favor of various exchanges. The company's major bank facilities are non-fund based in nature, despite the fact that the Interest coverage ratio stood healthy at 6.22x in FY2024.

### **Established Track Record of Group and Experienced Promoters**

MSFL is a financial service provider based at Rajkot, Gujarat and is a part of Marwadi Group. MSFL was established in 1992 as a private limited company and was converted to a public limited company in 2006. The company has an established operational track record in the equity broking business. MSFL has over 3.86 lakh active clients and spread across 246 locations covering 14 states across India and 111 branches of its own. MSFL is promoted by Mr. Ketan H Marwadi, Mr. Deven H Marwadi & Mr. Sandip H Marwadi and has more than 25 years of experience in stock broking business. This extensive experience of promoters and the long-established track record of the group has helped to build healthy relationship with their clienteles.

### **Key Rating Weaknesses**

#### **Susceptibility to uncertainties inherent in the capital market business**

MSFL engaged in the stock broking business and the stock market is volatile in nature, Market index like Sensex and Nifty goes up and down throughout the day and the company's operating performance is linked to the capital markets, which are inherently volatile as they are driven by economic and political factors as well as investor sentiments.

#### **Intense Competition**

## Press Release

Broking is a highly volatile and cyclical business with the presence of many established players who provide significant competition to the other fragmented and small players. The competition from large and established players and technology-focused new entrants is expected to continue to impact the revenue profile of players. This limits the profitability margins of the industry.

### **Liquidity – Adequate**

MSFL has maintained adequate liquidity in the form of gross cash accruals after dividends of Rs. 331.32 crores against no stipulated repayment schedule of the long-term loan as on 31<sup>st</sup> March 2024. The average fund-based utilisation levels stood low at ~51% over the past 12 months period ended February 2024 indicating sufficient liquidity cushion. Current ratio for FY2024 was 1.20x and quick ratio was 1.17x indicating adequate liquidity. Although it has a higher utilisation of the bank guarantee, most of its working capital facility such as overdraft facilities utilisation remained low and same is secured against FDs and Shares, which may provide a liquidity cushion for urgent requirements.

### **About the Company**
