

**Press Release**

**Purulia Metal Casting Pvt Ltd (PMCPL)**

**July 31, 2019**

**Rating**

<b>Instrument / Facility</b>	<b>Amount (Rs. crore)</b>	<b>Rating</b>	<b>Rating Action</b>
Long Term Bank Facilities	66.05 (enhanced from Rs.50.00 crore)	IVR BB+/Positive (IVR Double B Plus with Positive Outlook)	Reaffirmed
Short Term Bank Facilities	(6.00) (present o/s Nil)	IVR A4+ (IVR A4 Plus)	Withdrawn
<b>Total</b>	<b>66.05</b>		

**Details of Facilities are in Annexure 1**

**Detailed Rationale**

The aforesaid rating assigned to the bank facilities of Purulia Metal Casting Pvt Ltd (PMCPL) continues to derive comfort from its experienced promoters, strategic location of the plant, semi-integrated operations leading to operational efficiencies, continuous increase in scale of operations. The ratings however are tempered by its thin profit margins, increased debt level affecting the total indebtedness, volatility in the prices of raw materials and finished goods, high competition and cyclical nature in the steel industry and working capital intensive nature of its operations. The outlook is positive as the company is expected to expand scale and improve margins. Growth in scale of operations, improvement in profitability & gearing level, global demand and supply of steel products and efficient working capital management are the key rating sensitivities.

**List of Key Rating Drivers with Detailed Description**

**Key Rating Strengths**

**Experienced promoters**

PMCPL was promoted by Mr. Bhabani Prasad Mukherjee in 2004, a first-generation entrepreneur and has an experience of over three decades in the steel industry, which includes more than 10 years of experience in billet/TMT manufacturing. Longstanding presence of the promoters in the industry has resulted in established relationship with its

## **Infomerics Valuation And Rating Pvt. Ltd.**

customers and suppliers. Currently, the day-to-day affairs of the company is being looked after by Mr. Bhabani Prasad Mukherjee and his son Dr. Anirban Mukherjee.

### **Strategic location**

The manufacturing facility of PMCPL is strategically located in Purulia district of West Bengal which is in close proximity to various steel plants and various producers/dealers of its main raw materials. This results in easy availability of quality raw materials and savings in transportation costs.

### **Continuous increase in scale of operations**

Favourable demand scenario for steel products over the past three years resulted in higher capacity utilisation coupled with higher sales realisations for PMCPL. The company has achieved a revenue CAGR of ~26% during FY17-19 with a y-o-y growth of ~23% in FY19 (Prov).

### **Semi - integrated operations leading to operational efficiencies**

In FY16, PMCPL implemented a backward integration cum expansion project involving installation of two 15MT induction furnaces, re-orientation of continuous casting machine and liquid metal carrying facility (resulting in substantial reduction in raw material costs). To improve further, the company has set up a Mini Blast Furnace of 130 tons per day capacity along with Sinter Plant (under trial run presently) of 250 tons per day capacity for producing Hot Metal (Liquid Pig Iron). Major portion of the hot metal will be used as charge input for the induction furnaces and balance hot metal, if any, will be casted and sold. Pig iron is an essential raw material required in the manufacturing of Billets.

### **Key Rating Weaknesses**

#### **Thin profit margins**

The profit margins of the company have generally been low. The EBITDA margins of the company has been in the range of 3.7%-4.9% during the last three years. The PAT margin was thin at 1.87% in FY19 (Prov.) (improved from 1.65% in FY18).

#### **Increased debt level affecting the total indebtedness**

## **Infomerics Valuation And Rating Pvt. Ltd.**

Total debt of the company has increased from Rs.57.55 crore as on March 31, 2018 to Rs. 67.29 crore as on March 31, 2019. Increased debt levels to support the business operations impacted the total indebtedness of the company as reflected by TOL/TNW at 4x as on March 31, 2019 deteriorating from 3.34x as on March 31, 2018.

### **Volatility in the prices of raw materials and finished goods**

The cost of raw materials (coal, coke, iron ore, silico-manganese, MS scrap) is the largest component of PMCPL's total cost of production (~77% in FY19). It does not have any captive source for its primary raw materials (i.e. iron ore). Accordingly, the entire requirement for raw materials is met from the open market on spot prices. Given that these raw material prices are volatile in nature, the same exposes the company to input price fluctuation risk. Additionally, the demand for steel products to a large extent is driven by international and domestic demand supply dynamics, resulting in volatility in the prices of finished goods. Further, the company does not have any captive source of power which is one of the major inputs for manufacturing steel products. Absence of any captive power source renders the operations of the company susceptible to any revision in power tariff.

### **High competition and cyclicity in the steel industry**

The company faces stiff competition from not only established players, but also from the unorganised sector. The steel industry is also cyclical in nature and witnessed prolonged periods where it faced a downturn due to excess capacity leading to a downturn in the prices. Any adverse fluctuations in the prices of finished products or any downturn in the steel sector may impact PMCPL adversely.

### **Working capital intensive nature of operations**

PMCPL's operations are working capital intensive in nature. The company places purchase order for consumption of raw material in bulk at a time; thus, blocking major funds in inventory. This apart, the realization from its customers ranges between 60-90 days depending on the long term relationship with them. The company mostly funded its working capital requirements through bank borrowings which resulted in high utilisation of its working capital limits. The average utilisation of bank borrowings of the company remained high at ~99% during the past 12 months ended May, 2019. The company also manages its working capital requirements by availing higher credit period from its creditors.

## Infomerics Valuation And Rating Pvt. Ltd.

**Analytical Approach:** Standalone

**Applicable Criteria:**

Rating Methodology for Manufacturing Companies

Financial Ratios & Interpretation (Non-financial Sector)

### **Liquidity**

The liquidity of the company is stretched, marked by its weak current ratio and highly utilized bank limits leaving limited cushion.

### **About the Company**

Purulia Metal Casting Pvt Ltd (PMCPL), incorporated in September 2004, was promoted by Mr. Bhabani Prasad Mukherjee of Purulia, West Bengal. The company is engaged in manufacturing of MS Billets, TMT bars (Marketed under the brand name “PMC Prestige”). The manufacturing facility of the company is located at Purulia, West Bengal. The present capacity for billets and TMT bars is 127,940 MTPA and 120,000 MTPA respectively.
